1

PREFACE.

The people of Santa Chara County have very generously supported us in the publication of this Historical Atlas, and it has been our most sincere wish and conscientious aim to make it not only a fair equivalent for the money it has cost them, but at the same time a work which they may feel proud in showing to the many people who yearly visit the County in search of health, pleasure, or profit, and ask for such information as we have tried to condense within its pages. It is the first work of the kind ever attempted on the Pacific Coast, and its prosecution has been attended with many difficulties unforeseen by us in the heginning. The irregular surveys and intricate subdivisions of land, combined with its uneven topography, has made it much more difficult and expensive than any other County we ever attempted. Yet we are pleased to acknowledge that the enviable reputation for public spirit and enterprise that the people of Santa Chara County enjoy in other communities has been found by us to be well sustained. Had it been otherwise our undertaking must have failed for want of that support which we can only expect among prosperous and intelligent people.

It is not free from errors. Few persons without actual experience can comprehend the details of such a work; its cost, and the care and pains necessary to bring it to completion. We have spared neither money nor labor to make it as nearly perfect as possible, and do not believe that a reasonable public can magnify the few errors that crept in into any importance.

Our thanks are due to many individuals in the County for material assistance rendered us in prosecuting the work. Our limited space forbids us enumerating all such favors, but we would acknowledge our obligations to Messrs. A. T. & Charles Herrmann, Surveyors and Civil Engineers, San José. The thorough

knowledge of the County, its lands, divisions, and topographical features possessed by these gentlemen, and derived from actual field work as surveyors and engineers, has been freely placed at our disposal; also, the maps, plats, field-notes of actual surveys, etc., ou file in their office, have been of incalculable advantage and value to us, and have enabled us to make a much more perfect work than we could otherwise have done.

In this connection we will mention the names of J. Comh, present County Surveyor, and J. H. Piper, City Engineer of San José. These gentlemen have freely given us what assistance their positions enabled them to.

On hehalf of Mr. H. S. Foote, of San José, the gentleman who has conducted the Historical Department of the Atlas, we wish to return our thanks to many public and private individuals for facts and figures, hesides much other information that they have given us, and which could not have been gotten from any written records. We are also indehted to Mr. Fred. H:dl for many historical facts gleaned from his history of San José.

Our acknowledgments are also due to the honorable Board of Supervisors for their high appreciation of our work, and the encouragement they gave it; to the County officials, who have at all times sided us in gathering such facts as were necessary from the records; to the Press for their cordial encouragement and support of our enterprise; and to our numerous subscribers throughout the County for their liberal patronage.

We send it forth confidently helieving that it will be received as the most complete and valuable Compendium of County Information over published on the Pacific Coast.

HISTORY OF SANTA CLARA COUNTY, CALIFORNIA.

BOUNDARIES.

The boundaries of Santa Clara County, as defined by the act of the Legislature establishing the same, are as follows: Beginning at a point opposite the mouth of the San Francisquita Creek, being the common corner of Alumula, San Mutco, and Santa Chru Counties; thence easterly to a point at the head of a slough, which is an arm of the Bay of San Francisco at its head, making into the mainland in front of the Gegara runches; thence custorly to a lone sycamore-free, that stands in a ravine between the dwellings of Fluhencin and Vulentino Gegurn; thence easterly up suid ravine to the top of the mountains, as surveyed by Horaco A. Higley; thence on a direct line easterly to the common corner of Sun Joaquin, Stunishurs, Alameda, and Santu Chra Counties, on the summit of Coast Runge; thence southeasterly, following the summit of the Coast Range to the northeast corner of Monterey County; thence westerly, following the northern boundary of Monterey County to the southeast corner of Santa Cruz County; theree morthwesterly, fallowing the summit of the Santa Cruz Mountains to the head of San Francisquito Creek; thence flown said creek to its month; thence in a direct line to the place of beginning. Containing about thirteen hundred square miles. the not establishing the boundaries of Santa Chara County, granite monmuents have been set along its northern line, dividing it from Alumeda On the south Sun Benito County, carved out of the eastern portion of Monterey County, his been created, but, with the exception of names, the southern boundary has not been changed. The eastern line, dividing Santa Clara from Stanislans County, has nover been exactly line, dividing Santa Clara from Stanishus County, has nover been exactly fixed, the topography of the country not permitting the actual application of engineering instruments. This uncertainty renders it impossible to give the exact area of the County, but the ligures above stated may be considered as an accurate estimate. The County contains, at the present time, nine political townships, to mit: Almalen, Ahrise, Burnett, Fremont, Gilruy, Milpitas, Redwood, San José, and Santa Clara.

The terms "Santa Clara County" and "Santa Clara Valley" are often used as comparison. This is a microlic section.

The terms "Santa Clara County" and "Santa Clara Valley" are often used as comprehending the same territory. This is a mistake, as the Santa Clara Valley extends beyond the limits of the Caunty, while the Caunty contains a large area that does not properly belong to the valley. The principal and best portion of the valley, however, belongs to the County.

DESCRIPTION OF SURFACE, TIMBER, ETC.

The South Clara Valley runs through the centre of the County from north to south, and obtains its greatest width, about fifteen miles, when at San José. On the east are the monatures of the Coast Range, wooded on their highest elevations and interspersed with numerous small valleys and cañons, which afford arable and grazing land. On the west lies the Santa Cruz Range, monatains of a more runged character, but still abounding with spots of soil of unequaled fertility. These two runges, at a distance of about trolvo miles sunth of San José, approach to within three miles of each other, but six miles further on they again recede to a distance of about six miles. A reference to the maps will give the exact location of the Coast Range is Mount Humilton, four thousand four hundred and forty-eight feet high, and of the Santa Cruz Range, Mounts Chonal and Bache, respectively three thousand five hundred and thirty and three thousand four hundred and thirty feet high.

The timber of the western range is principally redwood, which furnishes a superior lumber in almost inexhaustible quantities. Onk and madroim also abound. The timber of the western range consists mostly of scattering groves of oak, but not of a character or quantity to serve any purpose but for fuel.

PRINCIPAL STREAMS.

The principal streams of the County are the Coyote, Gnadalupe, Los Gatos, Lingas, Uras, and Penitoneia. A reference to the map will give the location of these nuter-courses.

EARLY HISTORY.

We have thus fur spoken of our subject as a County, but its existence as a County dates only from 1850, while the history of civilization within its limits is a hundred years old, and counts its beginning from the time of the establishment of the mission at Santa Clara, in 1777.

Previous to that time the County was inhabited by a tribe of Indians called the Olhomes or Gostanes, who appear to have lived as savages usually do, on spontaneous fruits and what they could scenre by hunting and fishing. California was considered a portion of Moxico and subject to Spain, which, at the time referred to, was under the rule of Charles IV. In November, 1776, Father Peān, a Francisem priest, visited this valley for the purpose of establishing one of those missions which were the pioneers of civilization of the New World. The site selected was at what is now the town of Santa Clara, and on the 12th day of January, 1777, a cross was ruised, an altar was exceed, the first mass was said by Father Towns do la Peān, and the mission was established,—although the formal ceremonics did not take place until six days after. The object of these missions was, on the part of the clergy, to Christianize and civilize the Indians, teaching them agriculture and such other arts and

industries as would make them useful citizens, while their souls were to be resented by incidenting a disposition to pious observances. The good Fathers seem to have found a very tractable set of pupils in the Indians of this valley, as we have no record of any resistance to their efforts on the part of the natives, and the work appears to have gone on smoothly, except when, now and then, the civil or militury authorities thought they could do better than the church in the work of civilization.

About this time the Spanish government came to the conclusion that Upper Culifornia might be made to yield some revenue to the crown, and following out the idea, began to offer inducements to soldiers and settlers who would locate in those portions of the territory set apart for that purpose. These inducements consisted of monthly pay, stock and agricultural implements, and grants of lumb.

ESTABLISHMENT OF THE PUEBLO OF SAN JOSÉ.

The Governor of Upper Chiffornia, Don Felipe Neve, had recommended to the King of Spain, through the Viceroy of Mexico, as a suitable site for a pueble a point on the Guadalupe River, three-quarters of a league from the mission of Sunta Clara, and at the same time asked anthority to make the location. It seems that no immediate reply was returned to this communication, and the Governor occupying an isolated position, and not desiring to be dependent on uncertain communication with the city of Mexico for subsistence, resolved to establish the town, and take chances of his acts being confluenced. He thought it would be a good thing to establish a colony in this rich raftey, which would be able to furnish not only supplies to the forces at the presidio at Sun Francisco, but also to add something to the royal revenue. This, he thought, would be a sufficient excuse for acting without orders. Accordingly he directed Don José Moraga, then Lieutemant Communaling at San Francisco, to take from his commund nine soldiers and two settlers, and three others, who were to be picked up for this special duty, and proceed to this valley. On the 28th of November, 1777, Lieutenant Moraga and his band event into comp on the Guadalupe at the point designated, and annonneed the camp as a Pueble, calling it San José de Guadalupe. The action of the Governor in establishing the Pueble without availing for orders was subsequently confirmed.

In 1783, Don Pedro Enges being Governor of California, an official division of real estate was made among the nine founders of the Pueble, a house lot and four spectres of land for entiration being given to each. The names of the funders, as described in the report of distribution, were Ignacio Archaleta, Manuel Gonzales, José Tiburcio Vasquez, Manuel Amesquita, Antonio Romero, Bernado Rosales, Francisco Avila, Schustian Alvitre, and Claudio Alvires. A fac-simile of the original plat, showing the division lines, appears in another part of this work. The Pueblo originally was four square leagues, and all the lands not distributed were to bu used in common for pasturage. In 1792, Vanconver visited the mission and the Pueblo, and we learn from his report that at that time the settlers entireated wheat, maize, pens, and beaus, that they ploued with inferior plows, turned the soil once over, then smoothed the same down with a harrow; and in the months of November and December they sowed wheat in drills or broadenst on the even surface, and sentehed it in with a barrow. Outs and barley they did not cultivate.

The original site of the Pueblo was about a mile and a quarter north of the present centre of the city, but owing to the lowness of the lund, which was often submerged in the winter-time from the overflowing of the Guadalupe River, permission was asked, and obtained, to move the location to the higher ground on the south. According to Frederic Hull, to whose excellent work, "The History of San José and Surroundings," we are indebted for many facts and figures, the removal was accomplished in 1797, the central point of the new location being near the corner of Market and Sur Fernando Streets. About this time a dispute arose between the Fathers at the mission and the people at the Pueblo as to the line dividing their respective settlements. After several appeals to the city of Mexico, the line was finally fixed hulf-way between the two. From the correspondence incident to this dispute, we learn that at this time the mission held fourteen lundred and thirty-four Christians, and that there were in the surrounding rancherias four thousand Gentile Indians.

In 1783 the town-bonse of the Pueblo, or, as it was called, the Juzgudo, was built. It was located at what is now the northwest corner of Market and El Dorado Streets, and remained until 1850, when it was pulled down. It was an adobe building, one story high, and with three rooms, which were used respectively as Alcalde's room, court-room, and juil.

The beautiful Alameda, considered one of the most charming drives in the world, was laid out by the Fathers at the mission in 1799, Father

The benutini Alameda, considered and of the most canding drives in the world, was laid out by the Fathers at the mission in 1799, Father Maguin do Catala being the projector of the work. He planted the lines of trees, now so venerable, and employed two bundred Indians to water and protect them until they were large enough to withstand the assaults of the eatile that then reamed at large all over the country. He also built the road, thus affording the people of the Pueblo pleasant traveling to the mission to attend religious services, there being at that time no chapel in San José. In 1803 the first chapel was creeted in the Pueblo, the same being located at the corner of Market and San Fernando Streets, where the Catholic church new stands. It remained until 1835.

It was but a short time after the settlement of the Pueble before the fertility of the soil began to demonstrate itself, yielding the richest burvests on the slightest provocation. We find, within six years after the planting of the orchards, that the production of fruit was so large that it dofied consumption it is natural state. The idea naturally occurred to the people that some of it could be made use of in the manufacture of spirituous liquor. This, however, could not be alone without consent from the commandant of the province. We find that on the 19th of August, 1805, permission was granted to one Manuel Higuerra to unknown burrel of peach brandy. This was probably the first lot manufactured in this County, as we take it for granted that Manuel availed himself of this permission.

The first public school that we have any report from was established in 1811, Rafinel Villavicencio, who is described as an "infirm corporal," being the teacher. Rafaol was to teach the children of the Pueblo to read, write, and the Doctrine, and was to receive for his services eighteen reales per annum from each head of family, to be puid in grain or flaur. One of the conditions prescribed by the decree establishing this school was, that during the time the children were at school their futhers were to be exempt from responsibility to God on their account, the teacher assuming this responsibility as part of his contract.

EARLY SETTLERS.

Up to this time the settlers had been either Spaniards or Mexicans, and nearly if not all had been recruited under the regulations prescribed by the Spanish government, when the Puchlo was first established. The first foreigner, of whom we have any account, who settled in this valley was John Gilroy. He was not only the first foreign settler in the Santa Chara Valley, but in California. He was a Scotchman, and lauded at Monterey in 1814 from a ship belonging to the Hadson Bay Company. He was ill of the searcy and was left on shore to be cared. Thence he found his way into this rulley and become a permanent settler. He matried into the Ortega family, and settled on the Ranche San Yeidro, a short distance east from the city which now bears his mane. He accumulated wast property in lands and herds, but finally, in 1869, died in absolute want.

Robert Livermore came to the Pueblo in 1816, but was only here for a short time. His final settlement arms about twenty miles northeast of San José, in the valley which now bears his name.

Prior to the year 1820 this valley had no commercial importance. Nothing senreely was sold. The principal business was agriculture, and whatever was accumulated was in the shape of bords and lands. At that time there was not a rehiele in the valley that had wheels with spokes, nor was there a foot of sawed lumber in the country. Stoves and fireplaces in the houses were not known until 1846. Neither was there a fouring-mill in all this region. In 1820 a traffic in hides and tallow began to grow up, which assumed some importance.

In 1822 a severe earthquake occurred, which is represented by tradi-

In 1822 a severe earthquake occurred, which is represented by tractions to have caused considerable injury to life and property. Among other stories is one to the effect that it destroyed the church at Sunta Chura. This appears to have been an exaggeration. It cracked and injured the tralls, but did not destroy the church.

In 1821 the Mexicans achieved independence from Spain; but the

In 1821 the Mexicans achieved independence from Spain; but the change of rulers created no particular excitement among the colonies of California. Up to December, 1828, there had been 8279 baptisms, 2876 marriages, and 6408 deaths recorded at the mission at Santa Clara.

The first census or enumeration of inhabitants of which we have any

The first census or enumeration of inhabitants of which we have any knowledge was in 1831. At that time there were at the Pueblo 166 men, 145 women, 103 boys, 110 girls, making a total of 524. The crops raised that year were 2000 bushels of wheat, 2000 bushels of corn, and about 300 bushels of beans. The stock numbered 4143 head of cattle, 2386 head of horses, and 134 mules. The average price of a mule or saddle-horse was ten dollars; an ox or con, fire dollars; and a sheep, two dollars. The chief business was raising cattle for their hides and tallow. They also found a ready market for their grain, which was principally purchased by the Russian Fur Company, at about two dollars and twenty-fire cents per bushel.

After 1830 the number of foreigners began to increase, their whole number at that time being estimated at about seventy. John Burton, afterwards Alenlde, came in that year. Harry Bee arrived in 1828. William Gulnne, J. Alex, Forbes, and James Weeks, came in 1833. Thomas Donk, William Wulch, Nicolas Dodéra, Muthur Fallon, William Smith, Ephraim Fravel, Thomas Pepper, and an American called Rill great been in 1833, but the date of their arrival is not known.

Bill, were here in 1833, but the date of their arrival is not known.

Thomas Brown, William Daly, and George Ferguson came in 1824.

In 1835 the Pueblo did not contain more than forty divellings, including houses and luts of all kimls.

We have no record of any ovent of special importance locally from 1836 to 1846. The growth of the country in population was slow, there being at the mission of Santa Clara, in November, wheat eighty women and children, twenty-five men, and about half a dozen boys certly grown. The foreign immigration from 1833 to 1846 was about as follows: In 1838, Henry Woods and Laurence Carachele; in 1841, Charles Weber, Josiah Belden, Grove C. Cook, Peter Springer, William Wig-

gins, Henry Pitts, and James Rock; in 1843, Peter Davidson; in 1844, Thomas Fallon, Julius Martin and family, Thomas J. Shadden and family, Mr. Benaett and family, Captain Stephens, Dr. John Townsond and wife, Allen Montgomery and wife, Martin Murphy, Sr., with his wife, five sons, and two daughters (two of bis sons, Martin and James, bringing their families), Jas. Miller and wife, Matthew Harlin, — Calvin, Jos. Foster, John, Michael, and Miss Sullivan, Oliver Magnet, —-; Hitchcock and family, Patrick Martin, Sr., and two sons, Moses Schallenberger, Thomas Hudson, and John Conners. The party with which Martin Murphy came was the first that ever succeeded in bringing wagons across the mountains. Many had tried, but all had failed, and had been forced to abandon their teams. In 1845 about twenty new arrivals were neted, among whom were Frank Lightston, Wm. R. new arrivals were neted, among whom were Frank Englished, where Busslam, John Daubenhiss, and James Stokes. In 1846 there was quite a rush to this valley. We note among the arrivals this year, Isaac Branham, Chas. White, Zachariab Jones, Wm. McCutcheon, Jas. F. Reed, Joseph Aram, Jucob D. Heppe, Wm. Daniels, George Donner, William and Thomas Campbell, Poter Quivey, Edward Pyle, Thos. Kell, S. R. Moultrie, S. Q. Broughton, and Dr. Isabell, nearly all of whem brought their families with them. Those who came with Wm. McCutcheon, Jas. F. Reed, and George Donner constituted the famous Donner party, whose sufferings in the mountains make such a sad chapter in the history of this coast. This party was caught by the snew near Donner's Lake, and were unable to force their way out, and for menths they lay in the mountains exposed to hunger and celd. They soon consumed their stares, including the draught animals, and many of the mon, women, and children perished of starvation. Of the large number that constituted the company, but a mere handful was left when they were brought out in the spring by a party from this side. Mr. Wm. McCutebeen, w lieve, is the only surviver of this party, who was a man grown at the time this horrible experience was had. A number of the children who were nursed through that winter have grown to man- and wemanhood, and are now residing in San Jesé.

The first flouring-mill creeted in this valley was built by Pedro Sanse-vain, on the Guadalupe. It was a primitive affair, of no great capacity, but was a great improvement on the Indian mortar, or the band mill, which had previously been used.

MEXICAN WAR.

The trouble between the United States and Mexico began to make itself felt in this valley in 1846, at the time General Fremont came into the country. Pie Pice, who was then Governor of California, bated the Americans with true Mexican cordiality. The grounds of his hatred, which he enumerated in May of this year in his address ta the Departmental Assembly, will seem peculiar when read in the light of the experience of to-day. He said, "We find ourselves threatened by hordes of Yankee immigrants who linve already begun to flock inta our ceuntry, and whose progress we cannot arrest. Already have the wagons of that perfidious people scaled the almost inaccessible summits of the Sierra Nevada, crossed the entire centinent, and penetrated the fruitful Valley of Sacramento. What that astanishing people will next undertake I cannot say; but in whatever enterprise they embark they will be sure to be successful. Already these adventurous voyagers, spreading themselves over a country that seems to suit their tastes, are cultivating farms, establishing vineyards, creeting saw-mills, sawing up lumber, and deing a thousand other things that seem natural to them."

The colobrated "Bear Flag" was raised at Sonoma on the 14th of June,

and the Americans declared California ta be independent and free frem Mexican rule. General José Castro, commander of the Mexican troops, then had his beadquarters at Santa Chra. He issued a proclamation calling on the Mexicans ta rally and wipe out the invaders, at the same time promising protection to the lives and property of these foreigners

who stayed at home and did not aid or comfort the Americans.

Coptain Thomas Fallon, then a resident of Santa Cruz, crossed the ountains in the night, and came into this valley with twenty-two men, intending to capture the Pueblo in the name of the United States. Hearing, however, that Castro, with about three hundred men, was on the alert, be withdrew his camp, which was about four miles and a half south

On the 7th of July, Commodore Sloat raised the United States flag over Montorey, and issued an address, in which was recounted the recent de-feat of General Arista by General Taylor. This news was conveyed to Castro, who immediately gave up the fight and left the country. Captain Fallon, who was watching Castro's movements, came inta San José with a force of thirty-one men on the 11th of July, took possession of the Juz-gado, and compelled the Alcalde to deliver up the archives. At that time there was not a single United States fing in the valley, but Captain Fallon procured one from San Francisce, and on the 13th he hoisted ad stripes over the court-bouse. Captain Fallon then left to join Fremont, but before going away he delivered the keys of the archives to Mr. James Stokes, who had been appointed magistrate.

During the remainder of 1846 the Pueblo was in fact a military camp, and the whole valley was a scene of war, but of rather n mild form com pared to mere modern campaigns. Two companies were formed, one consisting of thirty-three men, with Charles Weber is captain, and John M. Murphy as lieutenant. This company was stationed in San José, having their quarters in an adobe building on Lightston Street. The other company was under the command of Joseph Aram, and was quartered at Santa Clara. There was no regularly organized Mexican force in the field but a the field, but one Francisco Sanchez had collected a budy of about three hundred mounted Californians, and was roaming the valley. Licutenant Pinckney, of the United States ship "Savnnah," was sent to San José with sixty marines. He fortified the Juzgade, and made preparations to resist an expected attack hy largely superior numbers. No conflict was land, however, until December. About the 8th of that month Sanchez eaptured five men near the Seventeen-Mile House, nmong whom was Martin Corcorna, afterwards a preminent citizen of San José, and now proprietor of the Cameron House, at Santa Clara. On the 25th of December, hearing that Sanchez was between San José and San Fran-

cisco, Captain Weber started with his cempany ta give him hattle. After reaching a point near what is now the San Mateo County line, it was ascertained that the enemy had gone eastward into the Culaveras Valley. Captain Weber pushed on to San Francisco, and procured a reinfercement of about twenty marines and a small six-pound gun from one of the United States vessels, and then returned in the pursuit of Sanchez. mean time the latter had returned from the Calaveras and demanded the surrender of San José. Lieutenant Pinckney refused, and after Sunchez had circled round the town he came to the conclusion not to attack, and withdrew his men. Captain Weber's company, returning from San Francisco, came in sight of Sanchez's forces about twelve miles north of San Jose, and immediately pressed forward to attack. Sanchez, however, commenced to retreat, and it was not until they reached the grove between what is new Milliken's Corners and Lawrence Station, that they could get within rifle-range. Sanchez's treops, although well mounted and superior in number, were armed in n very unique manner. Some had swords, some guns, and some lances. Captain Weber opened on them with the little captage, but after a few discharges the gun was then with the little earnon, but after a few discharges the gun was thrown by the recoil from its carriage, and buried in the mud, and was of no further use. A brisk masket fire was kept up on both sides, Sanchez all the time refusing to come to close quarters, and finally retreating ut full speed towards the Santa Cruz mountains. The enemy lost four killed and five wounded. On Captain Weber's side enly wounded. After this the Americans received reinfercements from various quarters, and on the 8th of January, 1847, Sanchez surrendered his whole force, including the prisonors he had captured near the Seventeen-Milo House, and this eaded the war between Americans and Mexicans in

EARLY AMERICAN GOVERNMENT.

Culifornia, under Mexican rule, was called a Department, and was divided into three Districts, Santa Chara County being in the Second. chief magistrate of the Pueble was called an Alcalde. The first Alcalde of San José was Antanio Maria Pice, who was appointed in 1845. In 1846, Dolores Pacheco was Alcalde, but was eaptured by Thomas Fallon, who turned the office over to James Stekes. There was no superior tribunal in California at that time, nor were there any courts of the first instance in San José until they were established by American authority in 1849. Justice was dispensed in a very primitive manner, and without regard to legal technicalities. There being a lack of prisons, summary naltics were imposed. These penalties were inflicted with considerable discrimination. Indian culprits were flogged, and other criminals fined for erdinary offenses, and occasionally a term of service in the chain-gang was awarded. John Burton, who was Alcalde in 1846-7, held a court of unique character, if we are to judge by the records which he loft. was a man of little education, and if his judgments lacked legal symmetry they certainly struck at the bottam of the difficulties ho was called We have not space for the peculiar decisions ren dered by him, but give as a sample the case of Juan Sesaldo vs. Maria de las Naves. The plaintiff thinks the defendant, his wife, is about to abond, and desires that she shall be brought into court and explain why she will not live with him. After hearing the testimeny, Burton decided that the parties should be again united, and if they refused they should be imprisoned until they consented to live tagether. The defendant refused to comply with the Alcade's judgment, and was sent to jail. It is unfortunato that ne recerd is found to enlighten posterity as to the final result of the imprisonment, as it would be interesting to know bow long the woman's pluck beld out. Burton, however, came to the conclusion that the responsibility of the judicial office was too much for one pair of shoulders, and he, therefore, in December, 1846, of his own motion, appointed a Council to try eases, the persons so appointed being Antonio Sunol, Dolores Pacheco, José Noriega, Feliz Buelna, Salvador Castro, William Fisher, Isaac Brunhum, Grevo C. Ceek, Mr. White, Captain Hanks, and William Weeks. The people never to our knowledge raised the question as ta Burton's authority to appoint this committee, but submitted their cases to the Council with as little besitation as though it had been created by a formal constitution.

In 1847 the town site of San José, or Pueble lots as they were called, were surveyed, and the limits of the town fixed at Julian Street on the north, Eighth Street on the east, Reed Street on the south, and Market Street on the west. Washington Square, the place where the Normal School building is now locoted, was also laid out. In the same year J. D. Hutton surveyed the outside Pueblo lands into five-hundred-acre lots, which were divided by let among the bends of families.

In this year Mr. Benjamin Campbell began the erection of the first saw-mill built in this County. It was located about three miles above Saratoga, on what is now known as Campbell's Creek. The timhers for this mill be sawed out by hand with a whip-saw. The mill, however, not completed and ready for work until the following year. At this time improvements were gradually advancing in all portions of the County. Mr. Zacharinh Jones opened a hotel in the old adobe building jost east of Market Square, and called it the Half Moon. There were three stores in the city at this time,—one kept by Weber and Lightston, on what is now called Lightston Alley, one by Peter Davidson, and one by Antonio The principal articles of trado were hides and tallow. said that the level country between the town and the Eastern Foothills was literally strewn with the whitened hones of slanghtered entile.

The discovery of gold in 1848 caused great excitement in Santa Olara County, and people of all dogrees loft their crops in the ground and went to the mines. Some of them were successful, but many others were not. Among these who had the most marked success in gold-hunting was

John Murphy, he having on hand at one time about two millien dollars' worth of gold. There was but little coin in the country at that day, and gold-dust was used as a substitute, it passing current at four dollars per ounce, about twenty-five per cent. of its intrinsic value. Among others who made a good thing out of the mines were Dr. Ben Cory, O. M. Weber, James F. Reed, Dun Murphy, and Doctor Isubell. The rush to the mines caused the crops of that year to remain un-

harvested, and provisions consequently reso to almost fabrilous prices.

Flour sold at twenty dellars per barrel, and other articles in proportion.

During this year Zachariah Jones completed a sav-mill on Los Gauss It appears that lumber was exceedingly valuable at this time the mere cost of hauling it from Campbell's or Jones's mills being one

the mere cost of maning it from complete so the cones a mine being one bundred dellars per theusand.

In December, 1848, the first snow fell in this valley. In this year the first brick houses were built in San José,—one by Mr. Osborn, at the corner of Fifth and St. John Streets, one between St. James and St. John, on Fifth, and one on St. John Street, between Fourth and Fifth, 1849, many of the gold-hunters had returned from the mines, and the inflax of new immigration made things lively in and around the Pueblo. The houses were few, many of the people living in tents set up along the lines of the streets. Flour advanced to fifty dollars per barrel. A pair of hoots was worth from sixteen ta thirty-two dellars. Crime increased, and executions were numerous, but the County throve notwithstanding.

SAN JOSÉ AS CAPITAL OF CALIFORNIA

In November, 1849, the Constitution of the State was adopted, and San José was named as the location of the State capital. The Ayuntamiento or Town Council proposed to purchase a large adobe house, located on the south half of Lot 1, Bleck I, Range 1 south, on the cast side of Market Square, for the use of the Legislature. This house was built by Sainsevain & Rochon for a hotel, and they proposed to rent it for the use of the State for four thousand dollars per uponth. The Town Council, which had agreed to furnish suitable buildings for the State provided the capital was lecated in San Jesé, thought it more economical to purchase the building. The price asked was thirty-four thousand dollars; but the city lucked the necessary funds, and the owners were unwilling to take the Pueble authorities for security. Accordingly, a note for that amount bearing eight per cent. interest per month was executed by R. M. May, James F. Reed, Peter Quivey, J. D. Hoppe, J. C. Cohl, K. H. Dimick, Ben Cory, W. H. Eddy, G. C. Cook, Isaac Branham, P. Saiasevain, Peter Davidson, William McCutcheon, Joseph Aram, David Dickey, Charles Whita, F. Lightston, and R. C. Keys, and a deed of the premises was unde to Messrs. Aram, Belden, and Reed, in trust for the purchases to be conveyed to the Pueblo whenever it should pay for the same. It was from this purchase that the se-called "Forty Thioves" litigation origi-After the removal of the capital from Sun José, the city authorties sold the building occupied by the Legislature to the County for thirty-eight thousand dollars, the purebase-money to be applied to the liquidation of the note above referred to. It appears that this money was not so applied, and the trustees above named sued the city to obtain the forcelosure of a merigago executed to them by the Town Council in 1850, to secure the purchase price of the property used by the State. A decree of foreclosure was obtained, the Pueble lands were sold, and hid in by the trustees of the plaintiff. Under this sale the plaintiffs, who had organized themselves into a land company, claimed title to all the Puchlo This claim was resisted by the Pueblo authorities, and w source of long years of litigation.

The first Legislature of the State of California convened in San Jose

on the 15th of December, 1849. A good deal of dissatisfaction was ex-pressed at the accommodations offered by the city, and a bill was offered providing for the immediate removal of the State capital to Montery, but it was laid over. This winter was a lively one for San José if all the traditions are true. The Legislature was known as the "Legislature of a thousand drinks." The people of San José were hospitable, while the different candidates for the United States Senate kept open house.

The State was divided into Judicial Districts in Murch, 1850, and Sunta Clara County placed in the Third District, John H. Watson being olected Judge. The first cause tried in this court was that of Clemente Pinaud vs. Ramon Hurtade, Antonio Laman, Francisco Ballesteras, and Joaquin Bennetez, and was an action to obtain the foreclosure given to secure the payment of five thousand dellars, with interest at eight per

The principal in-deor unsusement at this time was the fandango, while the out-door sport consisted mainly of bull and hear fights, which were held either on Mnrket Plaza or St. James's Square. The first Fourth of July after the adoption of the Constitution was celebrated in San Jose in good style. William Voorbies delivered an oration in English, James Jones one in Spanish, and a Mr. Sanford read the Declaration of Independence. Quite a number of murders were committed in this County during this year. We have not room for details, but bave prepared a list of the executions which have occurred, which list will be found fartber on.

During 1850 two stage lines were put on the read between San Jose and San Francisco, one by Ackley & Merrison, and one by John W. Whistman, the fare being thirty-twe dollars, or, as the orthodox financial expression of that time would have it, "two onness." In the winter of 1850-1, the roads became so bad that these lines were withdrawn and the travel to San Francisco went via Alviso, connecting at the latter point with the stemmers "William Robinson" and "New Star."

The first court-house under the American rule was built in 1850, on First Street, a little seath of Santa Clara Street, and opposite Fouetain Alley. The old Juzgado was torn down during this year, and the adoles of which it was composed went into the construction of the fine adole building, built by John Hoppe, on the northeast corner of Market and Santa Clara Streets.

The second session of the Legislature met on the 6th of January, 1852. By this time other towns wanted the State capital, and there was no cui of scheming for its possession. Notwithstanding all that San José could do, Vallejo carried off the prize. The act of removal was passed Februury 14, 1852. In March, 1854, the question as to the legality of this ary 14, 1852. In march, 1865, the question is the shape of a writ to construe the Act of Removal. A majority of the Cearl, Justices Heydenfelt and Wells, decided that the capital of the State was legally in Sun José. On the strength of this decision a writ of mundate was regard in Sun José. On the strength of this decision a writ of mundate was issued, out of the Third District Court, against all the State officers, continuating them to remove their offices to San José, or show cause why they should not do so. After hearing the argument the Court sustained the

writ, holding that San José was the capital of the State. An appeal from this decision was taken to the Supreme Court. In the mean time Justice Wells had died, and his place on the beach was occupied by Jüstice Brynnt. On this appeal the Supreme Court, Justice Heydenfelt dissenting, decided that San José was not the capital of the State. Notwithstanding this decision, the people of San José still think that they were illegally deprived of the capital, and some of them have hopes that it will again be sent back to them.

COUNTY ORGANIZATION.

The organization of Santa Clara County occurred in 1851, and its government vested in what is known as the Court of Sessions, presided over by the County Judge and two associates, chosen from the Justices of the Peace of the County. A complete list of County Judges, Associates, Supervisors, etc., will be found in one of the tables on another page of this work. The boundaries list established included that territory known as Washington Townsbip, in Alameda County, but in 1858, when Alameda County was created, this part was cut off from Santa Clara. This was against the wishes of the settlers, who have not yet become reconciled to the change.

From 1861, when Santa Clara was made a county, she began to take on a business aspect, and from that date may be counted her substantial growth. Immigration had swelled her population to about six thousand, and people who originally came with no intention of staying beyond a few mouths or years, began to consider it a perumnent residence and to found hours. The growth of the County from that time to the present will be understood by a reference to the erop statistics presented elsowhere in this work.

The choiem first made its appearance in this valley in 1852, and proved fatal to quite a number of the fudians and Mexicans but only a few of the white population died. This was also its last appearance in this County. In this year the old Beila Union building, located on Santa Chara Street, was used as a contr-house. It was moved from there to the old State-House in 1863, but the latter heilding baving burned down, the huilding new known as the What Cheer House, at the corner of Second and San Fernando Streets, was purchased and made the Capitol of the Caunty.

Two events occurred in 1853 that created considerable excitement. One was the completion of telegraphic communication between San José and San Francisco, and the other was the rothery of the County Treasury. William Akeuhead was then Treasurer, and he anneaued to the people that on Sunday night, January 6, he was called to the door, and that upon opening it he was felled by a blow, and his pockets rifled of the key of the safe; that two men then went into the office and carried off twelve thousand dollars of the County's money. Although Akenhead offered a reward of one thousand dollars, the robbers were never apprehended, nor was any clue obtained as to their whereabouts. This, together with the further fact that Akenhead himself left suddenly the next year, ied some to believe that his story of the robbery partook something of the nature of a fable.

From 1868 to 1861 the County imd a steady course of prosperity. What was accomplished during that period will more fully appear in the special topics treated below. In 1861 occurred what is known as the "Settlers' War." By the terms of the treaty of Guadaloupo Hidalgo, entered into between the United States and Mexico at the termination of the war, and which gave California to the United States, it was provided that all grants of land made by the Spanish or Mexican government to their subjects in this States should be confirmed to the grantes, or their successors, by the United States, upon the proper showing. Soon after the treaty speculators began buying up these grants, the boundaries of many of which were not generally known outside of the speculators' ring. These purchasers commenced suits in ejectment against the settlers, many of whom had located upon tracts under the supposition that they were public lands. This litigation caused the settlers to form lengues throughout the State for mutual protection. In this County the purchasers of the Spanish title to the Chabelia Grant obtained judgment of ejectment against the settlers thereon, many of whom had occupied the land for quite a lengthy period. This decree was rendered by Judgo Mc-Kee, of the Third District Court for Santa Clara County, and writs of execution for possession were placed in the hauds of the Sheriff for service.

The Sheriti, knowing that resistance would be made to the writ, summoned a posse of six hundred must to nid him in its execution. That posse assembled at the contt-house, but refused to arm themselves. The Sheriff seeing that the sympathies of the people were with the settlers, dismissed his posse. In the mean time the settlers, having heard of the intention to eject them from their homes, assembled to the number of nearly one thousand and paraded through the streets of the city. They were all armed,—some were on horses, some on foot, some in wagons,—the column being supported by one small cannon. It is said that leagues from other counties had sent men and arms to the assistance of the settlers of Santa Chra County, and were propared to still further aid thom if necessary. There was no violence offered, and the sottlers returned to their homes with no other domonstration except the announcement that they meant "business." The matter was peaceably adjusted afterwards, but the demonstration had the effect of causing Judge McKee to adjourn the May term of the District Court, on the grounds that there was no profit in readering judgments that could not be executed.

In 1862 the smallpox visited San José. Quite a number died from this loathsome disease, but the deaths were chiefly among those portions of the lower classes whose habits of uncleanliness invited the attack. During this year the Alameda Turnpike Company was organized. During the summer and full they repaired and guided the Alameda Road, between Sun José and Santa Clara, at a cost of twenty-eight thousand six hundred and eighty-five deltars. They placed a tell-gate near where the fair grounds now are. This gate was removed and the road made free in tells. 1868.

It was in this year, also, that Jusper D. Gunu, City Marshal, absconded, baving embezzled two thousand seven bundred and sixty-three dollars of the city money.

In 1863 the County rented the second story of the building at the southeast corner of Market and Santa Clura Streets, and used the same for County officers until the new court-house was finished, in 1868.

The first railroad train made its appearance in San José on the 16th day of Junuary, 1864. This was on the San Francisco and San José Railroad, and was an event which caused much rejoicing among the people, whose best means of communication with Sun Francisco had h y stage, or by way of Alviso, on the bay. It was an event of great im-ortance to all classes of the community. Santa Chara County had conportance to all classes of the community. Sand the construction of this road, issuing therefor her bonds at fifteen years, and bearing interest at the rate of eight per cent. per unnum. This road extended southwardly through the County, and reached Gilroy in 1869. In 1870 the road was extended through to Sulinas, in Monterey County, and a branch con structed from Gilroy to Hollister, in San Benito County. The Western Pacific Railroad, or rather the branch road, running from San José Niles, and there connecting with the line of the Western Pacific Ruilroad, was constructed in 1889, the first train reaching San José September 6 of To aid in the construction of this road, Santa Clara County purchased one hundred and fifty thousand dolbirs' worth of stock in the Western Pacific Railway Company, paying for the same in bonds of the County, at twenty years, bearing interest at seven per cent. per annual. From 1869 no incident of general importance has transpired, except

From 1869 no incident of general importance has transpired, except such as are fully referred to under special heads below, to which we refer, as we also do to the statistical inhies, for detailed information.

CRIMES AND PUNISHMENTS.

We have the record of nineteen executions of the death penalty since the establishment of courts in this County, two of which were for the erimo of grand largeny and the others for murder. The first executions of which we have any efficial notice occurred in 1849. In January of that year three Americans stopped Thomas Fallon when on his way to Santa Cruz, and attempted to rob him. Although he had on his person soma two thousand five hundred dollars, he managed by strategy to escape with a loss of only six ounces. These same highwaymen, leaving Fallon, encountered two Oermans, murdered them, and robbed them of eight thousand dollars in gold-dust. This was in the latter puri of December, 1848. The robbers were captured, tried by jury in the Alcalde's Court in January, 1849, and were hung on the Plaza within three days after. In the summer of the same year Antonio Valencia was executed for the murder of a son of Edward Pyle. This murder was committed in 1847, and the circumstances were briefly these: Valencia, young Pylo, and several native boys were playing on the rancho of Anistasio Chabolla, and in the play Valencia injured the horsa belonging to Pylo. Vulencia was at this time about eighteen years old. After the play young Pylestated for home, and the other boys began to plague Valencia, saying that his mother would have to pay for the horse he had injured. Being gonded by the taunts of his companions, Valencia jumped on a liorac and rode off, from which time nothing was seen of young Pyle until his remains were found in 1849. In that year a brother of young Pyle re-ceived a bint of what had become of the missing boy, and caused the arrest of Valencia. The prisoner, on being arraigned before R. H. Dimick, Judge of the Court of First Instance, made the following confession: "I killed a stranger on the ranche of Chabella. Chabella first told me to go and kill the stranger. I started right off, and lassoed him first, and dragged him a little ways, and then cut his throat." remains were found buried among some stones and rubbish. Vnleueia was hung on the Plaza, in the presence of the Alcalde and spectators. On the 30th of January, 1852, Theodore Basquez was executed for steal-

On the 30th of January, 1852, Theodore Basquez was executed for stealing a borse, the law at that time providing for the punishment of grand larceny by imprisonment or death, in the discretion of the jury. Under the provisions of this law, Ramon Roméro was executed November 20, 1852. The law was repealed April 19, 1853.

December 17 of the same year, Guailalupe, an Indian, was executed for murder. For some time provious to this, lawlessness and crime abounded in this vicinity. But the organization of Vigilunce Committees in the early fall of this year either weeded out the criminals or intimidated them to such a degree that they measurably suspended operations.

On the 22d of July, 1851, the Vigilance Committee hung Demasio Berryessa to a tree, in the southeast part of the town. He was supposed to have mardered Alexander McClure about a month previous.

On December 7, 1855, Pédro, an Indian, was executed for murder, and on the 14th of the same month Gregorio Soberana was executed.

September 12, 1856, Blus Anjelino was executed for murder. May 8, 1857, Francisco, an Indian, was executed for murder July 11, 1867, Ricardo Lopez was executed for murder.

July 18, Francisco Guiloroz suffered the same ponalty. November 2, 1860, Salvador Garcia was executed for murder. July 10, 1868, Abner Smith was executed for the murder of Van Clean,

of Santa Clara.
October 80, 1863, Ab Pah was executed for murder.

March 19, 1875, Tiburcia Vasquez was exceuted for nurder. Vasquez was a noted outlaw, fumous for his robberies and murders throughout the State. In the month of August, 1868, ke, with a band of four men, made in descent on the village of Tres Pinon, in San Bentto County, robbed the store, murdered three men, and got off with his booty. He was pursued by the officers for some four hundred miles, hut succeeded in cluding them. He was finally captured near Los Angeles, through the treachery of one of his friends. He was tried in this County at the January term, 1875, of the District Court, was convicted chiefly on the testimony of one of his accomplices, and exceuted in the jull-yard by Sheriff Adams.

CLIMATE AND SOIL OF SANTA CLARA COUNTY.

It would be impossible to give in words all the characteristics that go to make up the peculiar climate of Santa Clara County. The winters are not cold, nor are the summers hot. During the winter-time snow falls on the tops of mountains, but rarely extends down into the valley; indeed, there are but three instances within the last hundred years when this has occurred, and even then it disappeared almost as rapidly as it

fell. The winter months are colled by some the rainy season, but this term would convey to the stranger a wrong impression; our winters, in reality, corresponding to the spring in other States. It is during this season that we receive all the rain that we get during the entire year, but the intervals between the showers are usually of a longer duration than the showers themselves. It is during these intervals that formers sow their grain. The average rainfall per vanum is about fourteen inches. It is a usual thing to expect a slight shower during the mouth of May, but the regular rains cease at about the same time that States in the East receive their last full of snow. From this time on, with the exception of a slight shower in November, no rain falls until about the middle of December.

The long dry season from April to November is especially favorable to the maturing of erops of all kinds. It causes the death of all insects and vernin, so destructive to fruit and grain in countries where the summer months are interspersed with frequent showers. It affords the farmer ample time to harvest his crops without fear of injury from rain. It is this peculiarity also which, by thoroughly ripening the grain, gives to California wheat its world-wide reputation for excellence, and which causes that perfection in California fruit which has excited the admiration of people in less favored States.

We give the following thermometrical observations of mean temperature of the coldest and of the warmest months of an average year:

	6 A.M.	12∄ г.м.	6 r.M.
August	53.16	83.74	61.87
December	36.61	68.68	45.26

Light frosts visit the valley during the winter-time, but they are nat usually of sufficient severity to injure the tenderest plants. On each side of the valley and just at the first bonch of the Foothills there is a strip of country about three-quarters of a mile in width, running the whole length of the County, and which is termed the Warm Belt. Within these limits frost is unknown, and semi-tropical fruits have been successfully cultivated. The climate of Sunta Clura County is no less fuverable to animal than to vegetable life. Shut off as it is from the ocean by a high range of mountains, it is effectually protected from the hursh senwinds and disagreeable fogs so fatal to persons of delicate constitution. The prevailing winds are from the south during the summer-time are cool, and conducive to healthful sleep. The valley has never known a sultry day nor an oppressive night. Climatic diseases are unknown in Santa Clara County, and epidemics are so rare that only two have been experienced within the memory of man, and those were disastrous only to those whose habits invited disease. Buyard Taylor, who has experienced all the climates in the world, says of the Santa Clara Valley, that "there is no place within the jurisdiction of the United States, scarcely any in the world, where men can, so many days as here, in the three hundred and sixty-five of the revolving year, exclaim, in trath, with the poet,—

" Sweet day, so pure, so calm, so bright, The bridal of the earth and sky."

The soil of this County is varied, but in all of its variations it loses nono of its excellence. It is generally a loam made up of alluviul deposits, and ranges in depth from four feet to an indefinite distance. In some portions of the valley it has been penetrated to a depth of over a hundred feet, and the bottom was not found. Its adaptability to different products depends principally upon its proximity to water-courses. Most of it is easily worked, and, if ordinary care is used in its cultivation, yields bountiful harvests to the husbandman. The capabilities of the soil will be more definitely assertained by a reference to the table of productions published elsewhere in this work.

AGRICULTURE, HORTICULTURE, ETC.

A detniled sketch of the progress of agriculture in Santa Chara County would occupy more room than we can devote in the limits of a work like this. The agricultural possibilities of the County were what attracted tha first settlers, both at the mission and at the Pueblo. The Spanish government wanted horses and provisious for its army, and it was this that induced the order directing the settlement by Lieutenant Moraga.

We have given heretofore the amount and character of the products of one of the carliest years in the history of the County, and we give below a statement of the products for the year 1874; the comparison of the two will afford an excellent idea of the progress that has been made within that time.

PRODUCTIONS.

Thoro is scarcely anything that soil will produce that cannot be grown with more or less profit in this valley. Wheat will yield from thirty to eighty bushels per acre, and burley and other ceremls in like proportion. Wheat was one of the first ceremls mised in this valley, and there is had in this County that has been sown to this crop nearly every year since, and still produces a good yield.

Certain portions of the County are well adapted to the growth of hops,

Certain portions of the County are well adapted to the growth of hops, which are pronounced by European dealers to be the best in the world. All kinds of vegetables yield largely. Tobacco, both Havnnaand Florida, is grown with great success, particularly in the southern portion of the County.

Of late years considerable attention has been given to the breeding of fine cattle, and the berds of Santa Clara County now carry off many of the best prizes at the State and other fairs. The Angera or Cushmers goat thrives well here, and many pounds of this valuable fleece are yearly shipped to the Eastern market.

Fruit culture was one of the earliest industries engaged in in this County. The Fithers at the mission planted the grapovine as one of their first agricultural efforts. Orchards of peach-trees followed, and other fruit in succession.

The quality of the fruit, bowever, was very inferior; and although large quantities were grown, it was comparatively worthless. But within the last fifteen or twenty years this has been changed. The old and worthless trees knwo either been cut down or rooted up, and newer

orchards of superior quality have taken their place, until now this interest is one of the most valuable in the County, yielding an immense revenue. Every variety of fruit known to the temperate zone reaches the greatest perfection in this valley, while many semi-tropical fruits are cultivated with profit.

Santa Clara County supplies the State with strawberries, being the only County where this fruit is successfully grown in sufficient quantities to be dignified by the name of a crop. Here there are many tracts, ranging from ten to eighty acres, devoted exclusively to this fruit,—the yield of which, during the height of the season, is about three buodred pounds per day per acre. The average price during the whole season is about seven and one-half cents per pound. In 1871, the number of strawberry plants returned by the assessor was twelve millions. Since that time this number innst bave been at least doubled.

The growing of plums and prunes has, of late years, assumed great importance. The value of these fruits when dried, and the safety with which they can be shipped when green, has given a great impetus to this

Viniculture is an important pursuit in this valley. The largest vine-yurd in area is that D. M. Harwood, in Union District, and contains one hundred and forty neres; but the Almaden Vineyard, of one hundred and twenty-eight acres, owned by Mr. Le Franc, contains more vines. There are many other vineyards runging from seventy-five acres down. The old Mission grape has given place to the best foreign varieties, which in this County are said to thrive better than in their native soil.

Several experiments are being made in the culture of almonds; there being several orehards intely planted of from fifty to one hundred and cres; and there is every indication that the experiment will prove pecuniarily successful.

Great as is the amount of fruit of various kinds now raised in this County, it seems that this industry is only in its infancy. There are thousands of acres of unoccupied land in the footbills and mountains specially adupted for this purpose, and the value of which for fruit growing has just begun to be realized.

AGRICULTURAL PRODUCTS.

Land inclosed in 1874-peres, 514,174; land cultivated in 1874-neres, 206,967; wheat—aeres, 174.836; wheat—hushels, 1,701,132; barley—acres, 12,903; barley—bushels, 123,197; oats—aeres, 852; oats—bushels, 12,948; rye—aeres, 187; rye—bushels, 2036; corn—aeres, 113; corn—bushels, 6283; peas—aeres, 7; peas—bushels, 103; potatoes—aeres, 187; potatoes, tons, 3493; sweet potatoes—acres, 7; sweet petatoes—tons, 166; onious—acres, 42; onions—bushels, 5576; bay—acres, 29,269; hay tons, 57,921; hops—acres, 312; hops—pounds, 431,277; toheco—acres, 528; tohacco—peunds, 802,793; butter—peunds, 83,769; cheese—peunds, 514,007; wool—pounds, 112,027; honey—peunds, 1502.

FRUIT-TREES AND VINES.

Apple-trees, 111,127; pench-trees, 47,082; pear-trees, 85,095; plumtrees, 30,912; cherry-trees, 17,982; nectarme-trees, 1541; quince-trees, 2209; apricot-trees, 3754; fig-trees, 1417; lemon-trees, 1041; orange-trees, 3047; olive-trees, 1089; prune-trees, 6495; mulberry-trees, 1498; ond-trees, 2909; walnut-trees, 2703; grapevines, 1,237,379.

Wine-gallons, 137,847. Brandy-gallons, 73,587. Distilleries, 5; gallons, 17,948. Breweries, 2; gallons, 2,500,000.

LIVE-STOCK.

Horses, 11,218; mules, 483; asses, 24; colts, 2758; cows-2 years old and over, 12,887; calves—under 2 yours old, 5312; beet cattle—steers, 2 years and over, 14,393; oxen, 49; total number of cattle, 46,819; sheep, 61,644; Cashmere and Angora goats, 1634; hogs—1 year ald and over, 7782; hives of bees, 189.

IMPROVEMENTS.

Grist-mills, 9; steam-power, 7; run of stone, 22; water-power, 2; run of stone, 7; barrels of flour made, 64,875; bushels of corn ground, 3096; husbels of barley ground, 24,385.

Saw-mills, 5; steam-power, 3; water-power, 2; lumber sawed-feet,

Woolen-mills, 2; pounds of wool used, 163,995. Railroads, 4; miles in length, 72‡. Acres of wheat sown in 1875, 178,855. Acres of barley sown in 1875, 14,674. Acres of potatoes planted in 1875, 209. Acres of onts sown in 1875, 358. Assessed value of real estate in 1876, \$19,382,038. Assessed value of improvements on real estate, \$4,869,344. Assessed value of personal property in 1875, \$7,778,790. Estimated population in 1875, 31,000. Registered voters in 1875, 8997. Poll tax collected in 1874, \$18,197.

ARTESIAN WELLS.

One of the greatest blessings that Santa Chra enjoys is its abundant supply of wholesome water, drawn from the subterranean streams by means of the artesian wells. This supply is inexhaustible, and would, with the inauguration of the proper system, be sufficient to irrigate the entire valley. The first artesian well in the County was hered by the Merritt Brothers in 1854, on Fifth Street, over St. John Street. In the same year J. L. Shepherd bored a well about three miles cast of San José. This was eighty feet deep, and the water was forced into the pipe sixteen has ever heen constructed in this valley was bored by G. A. Dabney, in August, 1874, near San Fernando Street. It was sunk to a depth of sixty feet, when the water rushed up with a force that defied all efforts to confine it. It flooded all the surrounding lands, and the City Council de-

chared it a nuisance, and ordered that Dabney should pay a fine of fifty clared it a nuisance, and ordered that Dabney should pay a fine of fifty dollars for every day that he allowed the water to run. But this had no effect on the well, which for six weeks produced a stream four feet wide and six inches deep. At the end of this time the sinking of other wells in this neighborhood reduced the flow of water to such an extent that this stream was got under control. Many of these wells furnish a sufficient head of water to reach and supply the second story of houses. We give the following list of some of the deepest wells in the County: at the old bospital grounds, 355 feet; Mrs. Hensiey's, 302 feet; Mountain View, 450 feet; China Smith, 307 feet; James Murphy's, 437 feet; St. James's Source, 316 feet. Square, 316 feet.

PUBLIC BUILDINGS.

The public buildings of Santa Clara County are probably the finest in the Sinte. The court-house was commenced in 1866, and completed in 1868, at a cost of one hundred and seventy-three thousand seven hundred and thirtyseven dellars and ninety-six cents. It is of the Roman-Corinthian order of architecture, and is situated on the west side of First Street, opposite St. James's Square. The superstructure is of solid brick masonry, on a foundation of concrete six feet deep. The building is two stories in height, one bundred feet front, one hundred and forty feet in depth, ineluding portico. Its height to the cornice is sixty feet, to the top of the donre one hundred and fifteen feet, to the top of the flag staff one hundred and eighty-five feet. The diamoter of the dome at the base is fifty feet; at the top seventeen feet. The front is broken into a portice seventy-six feet long, fifteen feet deep, supported by a Corinthian colonnade, and fianked by fluted pilasters, which support the ontablature. The building has twenty-one rooms, two of which are used for court-rooms, the others being used for offices, all of which are finely finished and furnished. The principal court-room is sixty. ave feet long, forty-eight feet wide, and thirty-eight feet high, and is lighted from the ceiling by means of panels set with ground glass. It was built under the supervision of the architeet. Levi Goodrich.

The County Jail, which is located immediately at the rear of the courthouse, was also built under the supervisien of its architect, Mr. Goodrich. Its construction was commenced in the spring of 1870, and was finished in 1871, at a cost of eighty thousand dollars. It is surrounded by a high brick wall, and for health, conveniences, and security is considered one of

the first prisons in the State.

The County Infirmary is located on the County Form, about three miles southwest of San Jusé. This building was built in 1875, at a cost of about twenty thousand dollars, its problects being Messrs. Lenzen & Lash, who also superintended its construction. It is three stories in height, perfectly lighted and ventilated, and arranged with all the conveniences experience could suggest.

EDUCATIONAL.

In addition to its excellent system of common schools, Santa Clara County is the location of various institutions of learning.

SANTA OLARA COLLEGE

is situated at Santa Clara, on the site of the ancient mission. It is under the supervision of the Fathers of the Society of Jesus. The old Mission Church still stands there, but with a new roof and a modern front. It was founded in 1851, by Rev. John Nobili, but was not incorporated and empowered to confer degrees until April, 1855. No care nor expense has been spared to make this institution deserve the enviable reputation which it has achieved. From time to time new buildings have been added, until new its accommodations are of a very superior order. Its Faculty, presided over by Father Varsi, are men each one of whom is eminent in his special department. The average attendance of students is about two hundred. The philosophical apparatus, the chemical laboratory, the museum of natural history, the library, containing more than ten thousand volumes, together with the infirmary and the gymnasium, are all models in their way. The Faculty consists of thirty special instructors, excusive of the President. There are two distinct courses of study, the classical and the scientific. There is but one term in the school year, which commenees in August and ends in June.

UNIVERSITY OF THE PACIFIC,

under the auspiecs of the Methodist Episcopal Church, is located on what is known as the "University Tract," about midway between Sun José and Santa Clara. This institution was incorporated in 1851, the first graduating class being composed of Thomas H. Laine and John W. Owen, who were the first class graduated in a classical course in California. In 1870 the corner-stone of the present building was laid, the University having previously occupied somewhat crumped quarters in the town of Santa Clara. For several years a medical department was connected with the University, but this connection was dissolved in 1872. In 1869 the College and Female Institute were consulidated, ladies being admitted to the University classes on an equal footing with gentlemen, and allowed to compete for the same degrees. A large and elegant building has recently been creeted for the accommodation of the buly students, and a similar one is projected for the use of the gentlemen-College campus contains sixteen acres, improved with walks and drives, and abounding with shrubbery. Thus far thirty A.B., sixty-four B.S., and thirty-four M.D. degrees have been conferred. Roy. A. S. Gibbons, D.D., is President of the institution, and is assisted by a full and competent Faculty.

THE COLLEGE OF NOTRE DAME

was established in 1851, and the first structure was a wooden building, located on the present grounds on Santa Chira Street, between San Pedro and Santa Teresa Streets. But in 1863 the institution had grown so in and some recess streets. But in 1898 the institution and grown so in popularity that the increased number of pupils forced them to enlarge their premises, and they have now probably the finest college for young ladies in the State. The buildings, a sketch of which appears elsewhere, are immercus and substantial, and meet every want incident to an institution of this character. The grounds contain fourteen acres, surrounded by a brick wall eight feet high, and are beautifully adorated with lawns,

flower-beds, orehards, and vineyerds. The institution is presided over by the Sisters of Notre Dume, a sisterhood which devates all its energies and resources to the education of their sex. The course of study is complete and thorough, comprehending every item accessary to a finished education, both intellectually and morally.

SAN JOSÉ INSTITUTE AND BUSINESS COLLEGE.

This institution was established by Freeman Gutes in 1861, and is sit. nated on First Street, between St. James and Julian Streets. sided over by Mr. Gates up to the time of his decease in 1872, with exception of a short interval, when it was under the management of Mr. George E. Houghton. After Mr. Gates's death, the institution was conducted by Mr. Junies Vinsonhaler, in conjunction with Mrs. A. M. of the commercial depart-Gates, Professor Vinsonhaler taking charge ment, and bringing it up to a state of perfection seldom witnessed in schools of this character. Professor Vinsonhaler died in May, 1816 Mr. Louis Eberorayer was appointed to take charge of the commercial department. It has been a valuable help to the educational interests of Santa Clara County, and has done much good work in the ceuse of practical education. It is now in charge of Mr. Isaac Kinley as Superintendent. THE STATE NORMAL SCHOOL.

This institution, standing as it does at the hand of the common school system of the State, is looked upon with interest and pride by all citizens of the Pucific ceast. It is located in the city of San Jesé, on Washington Square, a tract bounded by Son Fernando, Seventh, San Carles, and Fourth Streets, and is one thousand one hundred and sixty feet in length by one thousand and five feet in width. It was denated to the State by the city in consideration of the making San José the location of the school.

The present building was commenced in 1870, Theodore Lenzen being the architect, and wes not fully completed until 1876, owing to the inadequacy of legislative appropriations, but it has been occupied for several year. The building is three hundred and fourteen feet long and two hundred and twenty-nine feet deep; in height it is seventy feet to the top of the cornice, and one hundred and fifty-two feet to the top of the tower, with a basement ten feet high in the clear. It is of the Corinthian order of architecture, and presents a magnificent appearance. Its total cost has never yet been definitely announced, but it will approximate two bundred and seventy-five thousand dollars. In addition to numerous com-modious recitotion-ronms, it contains a chemical laboratory, rooms and apparatus for philosophical apparatus and experiments, manikin and models for the study of anatomy, libraries, museum of natural history, etc. It has connected with it a training school in which surbtain a practical experience in teaching and dealing with children. During the year 1876-6, the number of students was live hundred and one. The institution is under charge of a Board of Trustees, of which the Governor of the State is Chairman. The Principal of the school is Mr. Charles H. Allen, who is assisted by a Board of Instruction composed of cleven experienced instructors.

COMMON SCHOOLS.

The common school system of California is carried out to its full perfection in Santa Clara County. The rigid examination to which the teachers are subjected insures the employment of none but the best material,-generally, only about twenty per cent. of those applying receive uired certificate.

The first common schools of the County were organized in 1853. There were two schools established, both located in San José. At that time the County did not own a school-house, nor did it possess a school lot. At present there are in Santa Clara County 53 school districts, with 83 school buildings; 105 teachers are employed, and there is an average attendance of 4892 pupils. The sum of \$90,672.99 is received from all sources as school money. The school-houses are built on the modern plan, with plenty of light, good ventilation, comfortable scats, and with a due regard to aesthetics. The average annual cost to the County of each pupil is about \$18.50. The number of children in the County of school ago is

MANUFACTORIES.

The high prices for labor which have ruled in California have hitherto had a depressing effect ou manufacturing enterprises in Santa Clara County, but she is fast recovering from this incubas. The adaptability of this County to manufacturing purposes becomes manifest when her great capacity for producing raw material is considered. Already several maunfacturing enterprises are successfully in operation. Principal among

The San José Woolen-Mills, established in 1870. Its capacity per an-

num is 144,000 yards of cassimere, 64,000 yards of flannel, and 5000 pairs of blankets, and employs 43 bands. The Santa Clara Valley Mill and Lumber Company, the San José Mill and Lumber Company, the Bear Creek Lumber Compuny, all of San José, and the Enterprise Mill aul Lumber Company of Santa Clara, represent the manufacture of lumber The saw-mills of these companies are located in the Red Woods, just over the summit of the Santa Cruz Mountains, while their planing-mills for the manufacture of mill-work are located in San José and in Sunta Clure. During the lumber season of 1875 these mills manufactured and sold in Santa Clara County about seventeen million

The manufacture of machinery and foundry work is carried on quite exumsively, the principal shops being those of Joseph Euright, Donald McKenzie, and Watkins & Scott. These shops manufacture all kinds of engines, agricultural implements, and east-iran work used in business

The Augora Robe and Glave Company was organized, In 1875, for the purpose of dyeing, tanning, and manufacturing the skin and ficece of the

Angorn or Gusbuner gont into robes, ruge, gloves, etc.

The maning establishment of Mr. Jacob Eberhardt, in Santa Clara, is one of the most extensive institutions of the kind on this coust, being capable of turning out all classes of work, from the most delicate glove kid to the coarsest sole leather.

The Suratogn and Lick's Paper Mills, one set of which is located at Alviso, have been run up to their full capacity over since they were established, and have proved the enterprise a success. The same may be said of the Summerville Pasteboard Mill, which is also located at

Flouring-mills of very extensive character are located in various por-tions of the County, and animally ship large quantities of flour to foreign ports. The most important of these are the mills of Moody & Bros., and Orange Mills, in San Jose; the Sunta Clara Valley Mills at Gilroy, and Rogers's Mills at Los Gatos, the latter being run by water-power.

The manufacture of kid gloves has also grown into quite an industry,

and preparations are being made for raising, tanning, and dyeing the skins used in this business.

The manufacture of fruit-boxes is an industry of great importance to the County. The principal factories are the Santa Clara Valley Fruit-

Pickage Mannfactory and the San José Box Factory.

The manufactory and the San José Box Factory.

The manufactore of tobacco and eigars is extensively carried on at Gilroy by the Consolidated Tobacco Company of California.

The manufacture of raisins, pranes, and other dried fruits is exten-

José Krnit-Pucking Company annually put up about five hundred thousand company of fruit for shipment. Wine and brandy are extensively manufactured, the principal wine-maker being Oburles Le Franc, of the Ahmaden Vineyard, and the principal manufacturers of brandy being General Naglee, Mr. Stockton, and Mr. Lainsermin.

There are numerous shops for the manufacture of wagons, carriages, farmiture, agricultural implements, etc., which are rapidly growing into bage manufacturing establishments.

The amount of capital invested in manufacturing enterprises in Santa Clara County will be seen by reference to the statistical tubles.

BUILDING STONE.

One of the most important products of Santa Clara County is the building stone found in the quarry of Levi Goodrich, located about eight miles south of San José, and a little south of the Almaden Road. This sound of sail Jose, and if it would for building purposes. It resombles somowhat in appearance Caen stone, of which the elty of Paris is huilt, but is of a much higher quality. It has a beautiful cream color, anchangeable by time or exposure to the weather. By a careful analysis made at Sauta Clara College it is found to consist of grains of silica, bound by a siliceous coment, and is pronounced to be the purest sandstone. It is perfectly thre-proof, tests having been made by heating it to red heat in a furnace, and then plunging it in a bath of cold water. This test produced not the slightest effect either on its texture or color. The supply is inexhaustible, and it is easily quarried of any size or shape. As yet these quarries have not been extensively worked, but as the quality of the stone becomes known the demand is becoming greater.

MINES AND MINING INTERESTS.

The new Almaden Quicksilver Mines, named from the mines of Almatlen on the frontier of Estremadura, in old Spain, are situated lifteen miles south of San José, in the Santa Cruz Mountains, at an elevation of seventeen hundred feet above the sen. They were known to the Indians at an early day, who resorted to them for the purpose of obtaining the red paint contained in the ciunabar, but who knew nothing about quicksilver. They used the paint to adorn their persons, and although they were severely salivated with every application, they, like the fashionable women of the period, were willing to sacrifice physical comfort to per-sonal appearance. A Spanish officer named Castillere, seeing Indians sonal appearance. A Spanish officer harmed custileto, seeing functions thus painted, made inquiry of them, discovered the location of the mino, and filed a claim to it. But not complying with the conditions prescribed in such cases, be lost control of it, and, after much litigation, it pussed into the hands of the Quicksilver Mining Company, by whom it is now held and worked.

These mines were first worked for quicksilver in 1845, but the operations were on a small scale, and no record exists earlier than 1850. have been, and are now, the most productive quicksilver mines in the world, excepting only the mine of Almaden in Spain. They are developed to a depth of thirteen hundred feet, and the workings extend horizontally, somewhat in the shape of the letter Y.

Between five and six hundred men find steady employment, the work being actively prosecuted throughout the year. From the 1st of January, 1864, to the 31st of December, 1875, the number of feet of drifting and sinking on the mines of the Company, as shown by the records, amounted to 129,724 feet, or 26.24 miles, at a cost of \$1,000,000. This does not in-

clude the excavations made in extracting ore fluring the period named.

nor any expenses for the same.

In 1875 there were used in the mines 2301 kegs of black powder (25) pounds each) and 9350 pounds of Giant and Herenies powder,—the rock in most cases requiring to be drilled and blasted. At the close of the same year about five miles of milroad, underground, were in operation, and over 2000 drills were in active use.

The reduction works consist of nine furmees, and include the most im-proved methods for working quicksilver ores. When the present improve-ments are finished, they may be considered as most complete and perfect in every respect.

The following table shows the production of quicksilver at New Atmaden for twenty-three years and three months, ending December, 1875

THE GUADALUPE QUICKSILVER MINES

are located about four miles northwest of New Almaden. They were first discovered in 1846, but soon went into the hands of a wealthy Eastern company, called the "Santa Clara Mining Association," of Balti-The mine contains many rich lodes, but at such a depth as to more. render it necessary to employ extra machinery la order to keep out the

"THE NORTH ALMADEN MINE" is situated about ten miles east of San José, on what is known as Silver Creek. This mine has been known for quite a number of years, but until lately has only been worked spasmodically and without capital or energy enough to develop its resources. During the present year it went into the hands of Captain J. H. Adams, an old and experienced miner, who has organized the North Almaden Company, put up a furnace, and proposes to develop the mine to the fullest extent of its resources. At the present time the prospect is flattering for a large yield of quicksilver.

a provailing impression, based upon superficial prospect, that the Senta Ornz Range contains large deposits of coal, while the Coast Range at various points contains good prospects for quicksilver, tin, copper, and other metals. But these are only the possibilities of the future.

SANTA CLARA VALLEY AGRICULTURAL SOCI-ETY.

This society was organized in 1853 by Louis Provost, Louis Pollier, J. B. Bontemps, B. S. Fox, and E. W. Case, under the name of the "Pioneer Horticultural Society," and held monthly meetings at the City Hall neer Horticultural Society," and held monthly meetings at the City Hall in San José, where the members compared products and held consultations. In 1854 an agricultural society was formed, and in 1857 the two societies were consolidated, and the present name adopted, the first officers being Judgo Daniels, President; Colman Younger and Joseph Aram, Vice-Presidents; J. C. Cobb, Secretary; B. G. Moody, Trensurer; L. A. Gould and L. Prevest, Directors. The first fair was held on the 18th and 19th of December, 1857, and fairs were held annually thereafter. 1859 the society was regularly incorporated under an act of the Legislature. In 1859 the present fair grounds, located on the Alamedu, were purchased from General Naglee for six thousand dollars. The purchasenurchised from General Plagueton, the County donating five hundred dollars. The tract contains seventy-six acres, and is now worth, including improvements, about one hundred thousand dollars. This society is probably in a better condition than any other similar organization on the In addition to the property owned by it, it has enough funds on hand to continue the improvement of the park and to afford liberal premiums to exhibitors. The fairs held by the society are always numerously attended from abroad, and afford the finest exhibition of stock, fruit, etc., in the State. The following is a list of Presidents and Secre-

ROADS AND HIGHWAYS.

For many years after the organization of the County the public roads were in a miserable condition, but of late years they have rapidly improved, until they are now inferior to none in the State. It has cost a great iteal of money to bring them to their present state of perfection, and about ninety per cent. of the flouting debt of the County was incurred for this purpose. Road-building is constantly going on, and will probably not be discontinued to any great extent until every point in the County is ensily accessible.

NEWSPAPERS.

The first newspaper published in Santa Chira County was the State Journal, edited by James B. Devoe. Its first issue was on the 19th of December, 1850, and its last in 1851, shurtly after the adjournment of

The San José Daily Aryns, published in the interest of Fremont, was established Junuary 4, 1851, but only lived through the Senatorial com-

The San José Weekly l'isitor was the first permanent newspap lished in Santa Clarn County. It was commenced June 20, 1861, by Emerson, Damon, and Jones. After the first six months Damon withdrew, and the publication was continued by Emerson, with A. Jones, Jr., as editor. It was Whig at first, but in October it was changed to the Deniceracy. Its name was changed in August, 1852, to the Santa Clara Register, J. C. Emerson and Givens George being the publishers, and F. B. Murdoch editor.

F. B. Murdoch having obtained control of the Register, its name was changed in 1853 to the Sau José Telegraph, and its publication was continued until 1860, when it went into the hands of W. N. Slocum, and in The Semi-Weekly Tribune was issued July 4, 1854, by Givens George.

In 1855 it was published by George & Keodall. In 1859 these partles sold out the paper to George O'Dougherty, who published it until 1863, when it was purchased by F. B. Murdoch, and became the Patriot. The Tribune was suppressed for about eight months in 1862 and 1863 by General Wright. It was then published by O'Dougharts.

In January, 1860, W. F. Stewart began the publication of the San José Daily Reporter. It was changed to the Weekly Reporter in April of the same year. It was discontinued after a few months' publication.

The San Jose Weekly Mercury was started in 1861 by J. J. Owen, the having obtained control of the Telegraph. In June. of that year B. II. Gattle went into the paper, which was then published by the firm of Owen & Cattle: On November 5, 1861, the Daily Mercury was started in connection with the Weekly, but was discontinued in February, 1862. In 1860 the firm consisted of Owen, Gattle & Conmy. In August of that year the publication of the Daily Mercury was recommenced, but was again discontinued in 1870. In this year Cattle and Commy retired, leavagain discontinued in 1870. In this year Cattle and County Tetrica, earling Owen in solo charge of the puper. In 1872 Owen & Cattle purchased the Guide, and again commenced the publication of the Daily Mercury in connection with the Weekly. In December, 1874, Cattle sold out his interest in both papers to J. J. Owen, who is now the publisher.

The San José Weekly Patriot was started in 1803, by F. B. Murdoch. In 1805 he commenced the publication of the Daily Patriot. The Weekly

Patriot was discontinued in 1874. In 1875, the Duily Patriot passed into the hands of S. J. Hinds and J. G. Murdoch, who are now the publishers. The Daily and Weekly Courier was started by George O. Tiffing in 1865, but only run a few months. The publication of the Santa Clara Argus was commenced by William A. January, on the 6th of January, 1868. He ran a daily in connection with the Weekly from August 10 to November 7, 1868. The Weekly is now published by Messrs. January, Kerns &

The Saturday Advertiser began publication August 11, 1866, with C. L.

Yntes as proprietor. It was discontinued February 13, 1869.

May 17, 1870, the Daily Independent was started by a company of printers. In December of that year it was purchased by Norman Porter, who in turn sold out to the Guide in 1871.

The Daily Guide was started in February, 1871, by Stockton & Hans-The Daily Guide was started in February, 1871, by Stockton & Hansbrough. Hansbrough sold out his interest to Stockton during the same year, who purchased the Independent of Porter, and merged the two papers under the name of the Guide. In January, 1872, Porter received the Guide from Stockton, and sold the same to Owen & Cattle in March, who changed the name to the Daily Mercury.

The Daily Press, by J. J. Conmy, was published for a few weeks during the early portion of 1872.

The Reporter was published by H. A. DeLacoy from April to August,

The California Agriculturist (monthly) was started by Brand & Hulloway in May, 1871. S. H. Herring purchased Brand's interest during the same year, and in 1874 be purchased Halloway's interest, and has published the paper ever since.

" Jaquary to April.

The Daily Evening Tribune was published during the eampnign of 1872, by Clevinger & Armstrong.

During the local option campaign of 1874, the Daily Independent Californian was published by Herring & Casey.

The Daily Garden City Times was started in August, 1874, by a syndicate of printers and literary gentlemen, but only lived about six weeks.

The Daily and Weekly Advertiser, by B. H. Cattle, commenced publication in May, 1875, and was discontinued December 4, 1875.

The Weekly Balance-Sheet, a commercial paper, was commenced February 12, 1876. H. S. Poote, publisher and proprietor.

The California Journal of Education was commenced June 1, 1876. G.

Hamilton, proprietor.

The Leader and Advocate is published at Gilroy. J. C. Martin, pub-

tisher and proprietor.

The Santa Clara Echo is published at Santa Clara. C. W. Uptan pro-

prietor, and W. C. Wilson publisher.

In 1869-10 a paper called the Enterprise was published at Mayfield, by W. H. Clipperton. It was moved to Gilroy in 1871, and called the Gilroy Telegrum. It only lived until the end of the compaign of the latter

The Temperance Champion-Alexander Murgatten, proprietor-commeaced publication June 1, 1876.

PLACES OF INTEREST.

Mr. James Lick, in his eclebrated deed of gift, appropriated seven hundred thousand dollars for the construction and maintenance of an astronomical observators on the Pacific const, and selected Mount Hamilton, in Santa Clara County, as the sile therefor. One of his stipulations was that the telescope to be creeted in the observatory should be the most werful in the world. The County is now building a first-class road to the summit of the mountain, which is about eighteen miles east of San José. This road is of a very easy grade, and winds round the sides of the mountain, presenting to the traveler at each turn a new and magnificent landscape. From the summit there is no unbroken horizon, with the Pacific Ocean on the west and the great San Jonquin plains on the east. Work is to be soon commenced on the observatory building, which will be completed as soon as possible. The road is already a favorite resort for tourists, and will possess superior attractions when the work is

THE PACIFIC CONGRESS SPRINGS are located about nine miles northwest of Santa Clara, and a mile from Suratoga, on a plateau in the hills. A hotel furnishes every recommodution to visitors. Stages ran regularly, and a telegraph line connects the hotel with all points in the State. The nalysis of the water is, chloride of sodium, 119,159; sulphate of soda, 12.140; carbonate of soda, 123.351; carbonate of iron, 14.080; carbonate of lime, 17.295; silica, alumina, with trace of magnesia, 49.882.

GILBOY HOT SPRINGS are located on the eastern slope of the Pucheeo Mountains, about fifteen miles east from Gilroy, and are about twelve bundred feet above the sea level. They are greatly resorted to by invalids, who find relief by bathing in the waters, which have a temperature of about 110°, and are strongly impregnated with iron, magnesia, sulphur, alum, and arsenie, the iron predominating. The springs are easy of access by stage from Gilroy.

The CITY PARK is located in Penitoneia Canon, about seven miles

oust from San José, on a portion of the Puchlo lands reserved by the city as a place of resort for her people. The approach is by the Santa Clara Avenue, a beautiful drive laid out and improved at the expense of the The Park contains about four hundred acres, and is traversed by a beautiful stream,-the Penitencia,-and abounds with mineral springs, both warm and cold. A magnificent hotel is to be erected on the grounds.

There are numerous summer resorts scattered through the County, while not a few of the merchant princes of San Francisco have built elegant mansions within its borders for summer occupation.

FINANCIAL CONDITION OF THE COUNTY

The total indebtedness of the County will be seen by a reference to the statistical tables. She has real estate and improvements, including schoolhouses, etc., amounting to about eight hundred thousand dollars. Her bonds bring a premium in the market, and her amount of taxable property is so large that the rate of taxation is as low as any other County in

THE COURT OF SESSIONS AND BOARD OF SUPERVISORS IN SANTA CLARA COUNTY, FROM ITS ORGANIZATION, IN 1860, UNTIL THE PRESENT TIME (1876).

On the 15th day of May, 1850, the County Court issued in order directing the Justices of the Peace to meet at the County sent on the 1st day of June, 1850, and elect two of their number to act as Associate Judges of the Court of Sessions.

At that meeting Caswell Davis and H. C. Smith were chosen as Associnte Justices, and the first Court of Sessions that had control of the County business was organized, as follows: J. W. Redman, Presiding Judge; Caswell Davis and H. C. Smith, Associate Justices.

July 5, 1851, John Gilroy appointed Associate Justice vice H. C.

August 18, 1851, un entry appears naming Charles Clayton and Caswell Davis as Associate Justices, but how Clayton's name comes in is not shown by the records.

October 6, 1851. R. B. Buckner and Marcus Williams elected Asso-

December, 1851. Cyrus G. Sanders appointed Associate Justice vice R. B. Buckner, resigned. May 14, 1852. Pelog Rush appointed Associate Justice vice Marcus

Williams, who was absent from the County. June 4, 1852. An election for Supervisors was ordered to be held on the second Monday in June, 1852, in accordance with an act of the Legis-

luture passed May 3, 1852. The following names comprised the first Board of Supervisors for the County, viz.: Isaac N. Senter, President; Fred. E. Whiting, Wm. E.

Taylor, Jneob Grewell. As organized December 6, 1852; L. W. Buscom, President; Ano. B.

Allen, A. M. Church, Levi Goodrich, and Juseph C. Boyd.
September 7, 1853: George Peck, President; Daniel Murphy, R. G.

Moody, Wm. Daniels, W. Gallimore. In April, 1854, the County government again went into the lunds of the Court of Sessions, with R. B. Buckner County Judge, Cas well Davis

und Thomas L. Vermuele Associate Justices

At the meeting held June, 1854, F. B. Murdoch served as Associate Justice vice Thomas L. Vermuele. July 26, Sanuel Rutherford took the place of Murdoch as Associate Justice. August 7, 1853, Mardoch again appears as Associate Justice.

October 1, 1854. R. B. Buckner County Judge, Caswell Davis and O. G. Thomas Associates.

October 25, Marcus Williams and J. P. Martin were Associates.

By act of the Legislature, March 10, 1855, a Board of Supervisors was re-established, and at an election held April 9, 1855, the following persons were elected: Samuel Henderson, President: Wm. R. Bassburn.

Daniel Murphy receives a majority of votes in District No. 3, but his name does not appear in any of the proceedings of the Board.

November 5, 1855. Wm. R. Busham, President; Wm. R. Bane,

Samuel Morrison.

1856-7. Cury Peebles, President; China Smith, D. R. Donglass.

1857-8. Joseph H. Kineaid, President; Samuel A. Ballard, Albert Worthen.

1858-9. John M. Swinford, President; Eli Jones, H. D. Coon. Isane Brunbam afterwards filled the place vacated by Eli Jones.

1859-60. H. D. Coon, President; H. J. Bradley, Isane Branbam.

1860-1. H. J. Bradley, President; H. D. Coon, Wm. M. Williamson.

1861-2. H. J. Bradley, Wm. M. Williamson, J. H. Adams.

Wm. M. Williamson, President; S. S. Johnson, J. H. Adums. Bourd held until Murch, 1864.

Murch, 1864, to 1866. J. A. Quinby, President; Chapman Yates, L. Robinson, J. A. Perkins, Frank Sleeper.

1866-7. d. A. Quinby, President; Frank Sleeper, John A. Perkins, J. Q. A. Ballou, John Cook. This Board held over until 1868, as there no election in 1866.

1868-9. John Cook, President; W. C. Hall, W. H. Patton, David Campbell, J. Q. A. Ballou [Oliver Cuttle, elected April 13, 1868, to fill

vacancy caused by resignation of Ballon].

1870-2. W. H. Patton, President, Samuel J. Jamison, J. M. Battee, David Camphell, W. H. Hall. 1872-4. J. M. Battee, President, Wm. Paul, J. W. Boulware, W.

Furlong, S. J. Jamison.

1874-6. W. N. Furlong, President; Wm. Paul, J. W. Boulwure, Abram King, A. Chew, H. M. Leonard, S. J. Jamison.

From April, 1876. H. M. Leonard, President; J. M. Battee, W. N. Furlang, Abrum King, A. Chew, S. F. Ayer, W. H. Rogers.

THE CITY OF SAN JOSÉ.

The history of Santa Clara County and that of the city of San José are so blended that we have carried both along together up to 1858. We have seen that the original survey of the Puchlo contained four square lengues of land, but this was afterwards stretched until the final confirmution of the Pueblo lands to the city gave a truet eleven and n half leagues long and two leagues and eight hundred acres wide. This hand has been sold by the city to netual settlers, and the proceeds have gone into the school funds of the city. The original limits of the city lave been extended from time to time until they have reached their present dimensions, and the huts and tents of 1846 have given way to solid brick business blocks and magnificent mansion-house.

At that time the principal hotels were the Mausion House, situated about where Music Hall now stands, the French Hotel, on Market Street, and Price's Hotel, at the corner of First and San Fernuado Streets

On the 11th of April, 1853, J. D. Happe, Martin Murphy, Chas. White, and several other of the most prominent citizens of San José were killed by the explosion of the boiler of the steamer "Jenny Lind." They had taken passage at Alviso for San Francisco, and when about opposite the Pulgas Ranche the disaster occurred. The event cast a deep gloom over the whole community.

The election in the fall of this year showed eight hundred and fiftythree votes east in the entire township. About one hundred houses were built this year, among which were the Mariposa store building, on Maret Street, the brick dwelling-house near the corner of Fifth and St. John Streets, and the building at the southeast corner of Santa Chira Street and Pacheco Alley. The City Hall building was completed in April, 1866. It was built under the impression that San José would soon ngain be the capital of the State, and it was constructed with a view to its possible use as a state-house. Levi Goodrich was the architect.

In 1858, the number of children within the city limits between the ages of four and eighteen years was 275 boys and 396 girls; there were 245 children under four years of ago

In March, 1859, a memorable affray occurred at the corner of Second and San Fernando Streets, in which Samuel J. Crosby and L. Posey Ferguson were killed; the latter's death was eaused by a random bull that came straggling into the court-house. During this year, Horace Gree-ley and Buyard Taylor lectured in San José. The first theatre building in the city was creeted in 1850, by James Stark. It was located on First Street, between Sunta Clara and St. John. It was opened with "Richt-

lien," on the evening of the 10th of October. Murphy's Block was built

this year. In 1801, the city having secured milroad communication with San In 1801, the city inving seemed riffront comming the city was pushed with vigor. In 1868 the Augeria House was built, Theodore Lenzen being the architect. The city's debt at the beginning of this year was twenty-five thousand dolars. The Hensley Block was built in 1864. In 1865 the Knox Block was completed, as was also the Ryland Block, at the corner of First and San Fernando Streets. During this year the entire

indebtedness of the city was liquidated. From 1861 to 1866 the increase of population was greater than during the preceding aftern years.

The block at the southwest corner of Santa Chara and First Streets was creeted by M. Levy, in 1867; the building at the northeast corner of Santa Chara and Market Streets was built in 1869. The Bank of San José building and the Commercial Bank building were creeted in 1872. Central Market was built in 1871, and the City Market in 1872. The first asphultum precipient was that on the north side of Santa Clara-Street, and was hill in 1810. The San José Opera House was opened August 18, 1810, with the play of "Landon Assurance."

The city directory, published in 1876, gives the names of five thousand

eight hundred and seventy-four adult actual residents in San José. This indicates a present population of about seventeen thousand.

STREETS.

San José has about one hundred and twenty miles of streets. The general width is eighty feet, with fifteen-feet sidewalks. Fifth Street is one hundred feet wide. Hitherto they have been constructed on an established grads, with curbs and gutter planks, and covered with gravel to u depth of ten inches in the centro and five inches at the curb. The average cost of street improvement is one dollar and fifty cents per lineal

CEMETERIES.

The first burying-ground was laid out in 1847, near the corner of Eleventh and William Streets But tew persons were interred there, the cornetery having been removed in 1849 to Oak Hill, its present location, about three miles south of the city, on the Monterey road. It now comprises a truct of about fifty acres. It is well laid out and is kept in good

STREET RAILROADS.

The San José and Santa Clara Horse Railroad was incorporated in 1868, and the roud was built that year; in 1869 it was extended eastwardly to the Coyote Creek. The original officers were: S. A. Bishop, President; J. H. Moore, Trensurer, and Class. Silent, Secretary. The first street horse railroad was built in 1872, the incorporators being S. A. Bishop, P. O. Minor, and A. L. Rhodes. The North Side Horse Ruilruad, connecting the intersection of First and St. John Streets with the northeastern city limits, was built in 1875. Davis Divine was the first President. Two other street railroads are projected, one running south to the cemetery, and one south lute the section of country known as the

San José has four incorporated banking institutions, as follows:

The Bank of San José, estublished Murch 12, 1806; incorporated January 31, 1868. Original capital, \$100,000; capital increased March 20, 1869, to \$250,000; surplus Jan. 12, 1876, \$81,846.07. Total capital and surplus, \$331,846.07. Value of real estate and improvements, \$120,000. Presidents, John G. Bray to February 14, 1871; Adolph Pfister to August 4, 1871; T. Ellard Beans from August 4, 1871, to present time.

Sun José Savings Bank, incorporated Jan. 15, 1868; cupital stock, \$160,000, increased to \$600,000 July 1, 1875. Vulue of real estate and improvements owned by the bank, \$54,000. Presidents since organization, James C. Oobb, now deceased, and John H. Moore, present incum-

Commercial and Savings Bank, incorporated May 8, 1874. Amount of

capital stock, \$1,000,000; President, C. T. Ryland.

Purmers' National Gold Bink, incorporated July 11, 1874. Authorized capital, \$1,000,000; paid up capital, \$500,000; value of real estate and improvements, \$90,000; President, J. W. Heinds.

SAN JOSÉ LIBRARY ASSOULATION.

Incorpurated July II, 1872; Library open to the public, Sept. 19, 1872. This institution is supported by dues from members. It occupies two rooms in Knox's Block, one of which is sixty by twenty feet, the other

forty by fifteen fect. The membership is as follows:

Annual members, 180; montbly, 180; life members, 21; honorary members, 12. Number of volumes in the Library, 4200; number of volnmes circulated per annum, 14,000. Since the organization of the Librury, the Mayors of the city have donated their salary toward its support, this precedent having been established by Mr. Adolph Pfister. Mr. Pfister also donated one thousand dollars in addition to his salary, which was set apart as the nucleus of a building fund. This fund amounts now to fourteen hundred and sixty-four dollars.

Mr. Pfister was the first President of the Association, and has held that position ever since. George W. Fentress bas been Librarian since

the organization of the society.

The San José Law Library was organized in 1873, and is supported by subscriptions and by a tax of one dollar on each litigant who files a complaint in either the District or County Court.

PUBLIC SCHOOLS.

We have given an account of the first public schools established in San José. They were then two in number, occupied reuted rooms, and employed two teachers. Now, there are nine schools, employing thirty-seven teachers, and occupying magnificent buildings built expressly for their use, and owned by the city.

The teachers receive salaries ranging from seventy to one hundred

und fifty dollars per month. The school census shows that in 1876 the number of school children between the ages of five and seventeen years was 2800, of which 38 were colored and 4 Indian. The average tendance during the year was about 1400. The revenue of the school department during the year was \$60,147, and the expense, exclusive of amount spent for building, was \$39,325. The principal school buildings

The Santa Clara Street school-house, built in 1867, at a cost of twenty thousand dollars. Lavi Guedrich architect, and Thomas Cook builder. Reed Street school-bouse, built in 1870, at a cost of fifteen thousand

eight hundred and sixty-eight dollars. Victor lifefiman architect, L.

Florkelson contractor.

Fourth Ward school-house, built in 1874, at a cost of seventeen thousand dollars. Levi Goodrich architect, O. W. Cook contractor.

First Ward school-house, built in 1875, at a cost of eighteen thousand

Levi Goodrich architect, and E. A. Vandalsen contractor. All of these buildings are magnificent structures, -large, commodious, and convenient. Views of each of them will be found in another part of the Atlas. In addition to these buildings there are five smaller ones, located in different parts of the city, for the accommodation of pupils in the primary grades.

ART ASSOCIATION.

The San José Art Association was organized in the early part of 1875 by a number of local artists, since which time meetings have been held each fortnight. The society numbers eighty members. The first public exhibition was held by this society in the latter part of May, 1876. The ultimate object of the society is the establishment of an art school in San

CHURCHES.

The following denominations have congregations in San José: Baptists, Christians, Congregationalists, Cumberland Presbyterians, Methodist Episcopal, German Methodists, Methodist Episcopal Church South, Methodist Episcopal Church (colored), Presbyterian, Catholics (two perishes, St. Joseph's and St. Patrick's), Episcopalian, United Presbyterians, Unitarians, Seventh-Day Adventists, Friends, and the Hebrow Congregation of Bickur Cholin. All of these have bouses of worship with the exception of the Christians, Seventh-Day Adventists, United Presbyterians, and Unitarians, who hold their meetings in different halls in the city. The St. Joseph's Catholic Oburch was burned in the spring of 1875, and a magnificent new brick edifies is now being creeted, at a cost of one hundred thousand dollars. A view of this building, taken from the accepted plan, can be seen in unother portion of the Atlas.

SOOIETIES.

The following societies are represented in San José:

Masonic.—San José Lodge, No. 10; S. W. Boring, W. M. Frieodship Lodge, No. 210; H. N. Androus, W. M. Electa Chapter, Order of the Eastern Star, No. 16; H. H. Cook, W. P. Howard Chapter, No. 14, R.

A. M.; M. E. Wilcox, M. E. H. P. Sun José Commandery, No. 10, Knights Templar; S. W. Boring, E. C.
I. O. O. F.—San José Encampment, No. 35; C. L. W. Sikes, C. P. San José Lodge, No. 84; W. C. Wilson, N. G. Garden City Lodge, No. 142; H. T. Weleb, N. G. Stella Rebekah Degrec Ludge, No. 22; D J. Porter, N. G. Allemania Lodge, No. 178; George C. Frick, N. G. Franco-Italian Lodge, J. Jacquelin, N. G.

U. A. O. D .- San José Grove, No. 23; A. H. Schnoder, J. P. A. Unity Grove, No. 27; J. Wonderlieb, J. P. A.

I. O. R. M .- San José Stamm, No. 77; John Philipps, Overchief. I. O. B'nai Brith.-Ariel Lodge, No. 248; M. Blumenthall, President.

A. O. H .- Sen José Division, No. 11; John Johnson, President. Janissaries of Light; J. B. Cox, B. of C.

Patrons of Husbandry.—San José Grange, No. 10; C. T. Settle, Master. Champions of the Red Cross.—San José Encampment, No. 12; Georgo Fetherstone, Commander. California Encamputent, No. 49; B. R. Foss,

I. O. G. T .- District Lodge; D. E. Busbnoll, D. D. G. Granger Lodge, No. 295; W. S. Boyles, W. C. T. San José Board of Trade; G. B. McKeo, President. St. Joseph's Benevolent Society; James Hagan, President. Austrian Benevolent Society; F. Pozzo, President. San José Tarnverien; Charles Doerr, President. Germania Verien; R. Pago, President. Handel and Haydn Musical Society; Elliott Reed, President. Philbarmonic Musical Society; A. N. Hamm, President. Adelphi Social Club; D. Delmes, President. Lecticoniun Literary Society; H. C. Gesford, President. San José Zouaves; F. Pillot, Captain.

SEWERAGE.

In 1870 the City Surveyor, by order of the Common Council, perfected a eystem of sewerage for the city of San José. The plan consisted of a main sewer, to extend along Seventh Street through the northern city limits, and thence to the Guadalupe River, with branch sewers connecting at each of the cross streets. The plan was elaborate in its details, and met with the general approval of the Council; but as yet the city has made no provision for its construction.

The estimated price of the main sower, constructed of brick, is about one hundred thousand dollare. The fall from the intersection of San Fernando Street to the point of debouchement at the Guadalupe is something over fifty feet, and would admit of the main sewer being placed at a depth of from fifteen to twenty feet, and by the aid of branch sowers would give perfect drainage for the whole city for all time to come.

The San José Gas Company was incorporated 1860, and finished their works and turned the first gas into their mains in January, 1861. The consumption for the first year was 65,000 feet. For the year 1870 the consumption was 3,961,270 feet. In 1876 the consumption was about 5,000,000 feet. The works of the company are situated on Third Street, between Santa Clara and San Fernando Streets.

The original charter expired in 1875, when it was extended one year. The price of gas at first was ten dollars per thousand feet, and now it is

WATER.

In addition to the artesian wells, the city is supplied by the San José Water Company. This company was incorporated in 1866, with a capital of one hundred thousand dollars, by Donald McKenzie and John Bonner, of San José, and A. Chabot, of Onkland; their franchise running for twenty-five years. Their first works were located at the southeast corner of Market and San Antonia Streets, where water was pumped from artesian wells into tauks, and thence distributed throughout the city. In 1868 the company obtained the franchise for the use of the water of the Los Gatos Creek. The company was reorganized, and the capital increased to three hundred thousand dollars. The stream was tapped at a point in the mountains about two miles above Los Gatos, and thence conducted by flumes and pipes to the reservoirs, and thence by main to San José. The works have a capacity of about fifteen million gallons, and supply both San José and Santa Clara with water, having about forty-five miles of mains and pipes in San José alone.

FIRE DEPARTMENT

The Fire Department of San José was organized in 1857, although several companies were in existence provious to that time; the oldest being the Hook-and-Ladder Company, organized in 1854. Empire Engine Company, No. 7, was organized in the same year.

Torrent Engine Company, No. 2, was organized in May, 1857; Frank-

lin Engine Company in 1871; Eureka Company in 1876. Washington Hose Company was organized in 1870, and disbanded in 1874. The other companies constitute the present Department. J. O. Gerdes is Chief Eagioeer. The Department has two steam fire-engines,—one a Silsby and one a Clapp & Jones. It has also two hand-engines and an improved ladder-truck, with all the appurtenances. Each company has a house of its own, all owned by the city. The effectiveness of the Department is demonstrated by the fact that no general conflugration has occurred since its organization.

PLACES OF INTEREST.

Sun José possesses too many beautiful buildings and grounds to make detailed mention possible in a work of this character. There are several, however, so prominent that they cannot be passed by in silence. Among these we note the elegant grounds now owned by Mrs. Samuel J. Hensley, on First Street. These grounds were laid out in 1853, by Mr. James R. Lowe, Jr., an eminent English handscape gardener, who was coupleyed for that purpose by Mujor Hensley. The promises contain about twenty-five acres, and are brought to the highest state of improvement that money cun command or skill suggest. The trees, shrubbery, and plants buve been gathered from all parts of the world, and show the possibilities of our climate in the way of vegetation. The apple-tree, the magnelia, the fuelisia, the jessamine, orange, heliotrope, the roso, the hickory-tree, the walnut, the almond, the maple, all thrive equally well. The grounds are interspersed with fountains, which add to the enchantment. A view of these premises will be found elsewhere.

The grounds of General Naglee were laid out in 1865. This tract of one hundred and forty seres extends from Eleventh Street to the Cayote, and from Santa Clara Street to William Street. The General has expended about one hundred and fifty thousand dollars in the improvement of these premises. They are beautifully laid out and well improved.

O'Donnell's Botanical and Zoological Gardens are located ou William

Street, near Tenth Street. They were laid out about fifteen years ago, but were only opened as a place of public resort in 1875. They contain a large variety of choice shrubs and plants, besides much else to interest

Live-Oak Park, located in the southeastern portion of the city, is a

beautiful grove, and much used as a place of public resort.

St. Jumes' Square, lying between First and Third Streets, and Market Plaza, both public squares, are beautifully laid out and ornamented, and

furnish a pleasant resort for the people.

San José for several years, by the beauty of its location, the mildness of its climite, its ease of access, and its superior educational advantages, bas attracted to it a large number of wealthy men from all portions of the country. These persons have built palutial dwellings and adorned their grounds, so that they have become the rule throughout the city.

EAST SAN JOSÉ

is one of the suburbs of San José, adjoining the city on the east. It was laid out in 1868 on the bomestend plan. It now contains about two hundred and fifty inhabitants, and is provided with an excellent school.

PUEBLO LANDS OF SAN JOSÉ.

Field-Nates of the Exterior Boundaries of the Pueblo Lambs of San José, situated in the County of Santa Clara, and finally confirmed to the City of San Jose. Surveyed under Instructions from L. Upson, United States Surveyor-General, by G. H. Thompson, Deputy-Surveyor. Survey commenced Juty 9, 1866.

Commencing at a point on the Guadalupo River as near as could be ascertained where the last live oak on said river was in March, 1828, and which is the same point described in the decree as the termination of the northwest boundary line of the Pueblo Lands. (All traces of said tree are now gone, but the point established is well known to be about the point where it formerly stood.) At which point is set a redwood post, marked "P. S. J. 1." Thence from "P. S. J. 1" in the direction of a live-oak tree in the mountains, which is plainly seen from this point, N. 61½°, E. 554 chains (variation 16° E.), to a live-oak about 20 inches in dinmeter, stunding on the summit of a rocky chemisal point on the west side of the summit of the ridgo. (This tree was pointed out as the tree described in the decree as the point of beginning, or N. E. corner of said Pueblo Lands.) Said tree is also the N. E. corner of the Ranche Los Tularcitos, and is marked "T." Thence from said tree, following the line of the Rancho Los Tularcitos, as finally surveyed, S. 42° 20', E. 176.80 chains, along the top of the ridge to a post in a stone mound, marked "T. No. 3;" corner No. 3 of the Rancho Tularcites; also, a post set in the same mound, marked " P. S. J. 3;" thence leaving the line of the Rancho Los Tularcitos, and continuing along top of ridge S. 52°, E. 400.68 chains, intersecting the line of the Rancho Canuda de Puls, 46.00 chains S., 613 W., from corner No. 3 of said Rancho, at which point of intersection is a post marked " P. S. J. 4;" thence through the Rancho Canada de Pala S. 333° E. 649.71 chains to corner No. 7 of the Rancho Canada de Pula, and corner of Sections 19, 20, 20, and 30 in Township 7 S., Range 3 E., a post being fixed in mound of stone, marked

"P. S. J. 5." Thence along the hills called San Felipe, leaving the Rancho Cañada de Pala, S. 244°, E. 1134.40 chains, to a monument of stone about six feet high, and about eight feet at the hase, on the summit of a rocky hill inside and near the northern boundary of the Rancho San de Las Llagas. (This monument was pointed out as the S. E. corner of the Pueblo Lands of San José, and answers to the description corner of the Puchlo Lands of San José, and answers to the description of the same given in the original survey and report of the Commissioners, of March, 1838.) Thence through the Rancho San Francisco de Las Llagas, S. 70½°, W. 554.00 chains, to a post on a steep hillside, on the north side, and about five chains, to a post on a steep hillside, on the north side, and about five chains from the head of branch of the Las Llagas, marked "P. S. J. 9;" thence over rough, brushy mountain, through the Rancho Las Uvas, N. 58° 24′, W. 1074.24 chains, to a large live-oak-tree called "El Encine," near the summit of a high spur of the Sierces, which was political out and described as one of the carginal bound. Sierras, which was pointed out and described as one of the original bound-aries of the Pueblo Lands of San Jose; said tree is seven feet in diametcr, and is a very prominent landmark, marked "P. S. J. 11;" and running thence, descending the steep side of the Sierras, N. 10%, W. 333.75 phains, to a post in mound of stone, marked "P. S. J. 14," on the summit of a small isolated hill in the valley. (This hill was pointed out as being the hill described in the decree, and in the Commissioners' reas soing the mil described in the decree, and in the Commissioner's report of 1838, and was at that time established as one of the boundaries of the Puchlo Lands of San José.) Thone N. 15½°, E. 347.47 chains, to a large menument of stone in a willow swamp, at the source of the Guadalupo River, one of the original boundary menuments of the Puchlo Lands of San José; a post is set in said moment of stone, marked "P. B. J. 16," and the line running thence through willow swamp, N. 72°, E 10.12 chains, to Station No. 16 of the Rancho San Juan Bantista, on bank of the Guadalupe River; thence general course northwesterly, with the meanders of the Guadalupe River, to the point of beginning.

The total number of square miles within the lands confirmed to the Puoblo is one hundred and one and seventy-six one-hundredths.

THE TOWN OF SANTA CLARA

is located three miles northwest of San José, and contains about three thousand inhabitants. It takes its name from the old mission, which was the first settlement in the County, and the nucleus of the present town. Santa Clara has had a sort of town government from 1852, but it was of no particular force until 1862, when a charter was obtained which defined the limits of the town, provided for schools, and defined the duties of This charter was amended in 1868, and in 1872 the present in-ion was consummated. The town as it is at present laid out is officers. corporation was consummuted. The town as it is at present two miles long and a mile and n balf wide. It takes its principal importance from the fact that it is the location of the Santa Clara College. It contains many beautiful residences, among which are those of Mr. Arguello and Mr. Pierce. Its schools are well conducted, and have ample mmodations. Its principal hotel, the Cameron House, is kept by Martin Corcoran, to whom reference has proviously been made in connection with the hattle of Santa Clara. It has one newspaper, the Santa Clara Echo. The Bank of Santa Chra County is located here. incorporated in 1875, with a capital of three hundred thousand dollars. James P. Pierce is President,

The Fire Department consists of three companies, which are provided with a hand-engine, a hook-and-ladder apparatus, and a " Babcock Extinguisher," respectively.

The different societies are represented as follows:

I. O. O. F.—Santa Clura Lodge, No. 52; W. N. Squires, N. G. True Fellowship Lodge, No. 238; E. V. Thorn, N. G. Santa Clara Encamp-ment, No. 32; Fred. Kington, C. P.

Masonic.—Santa Clara Lodge, No. 34; Wm. B. Kingsbury, W. M. Patrons of Husbandry .- Sauta Clara Grange, No. 71; J. A. Wilcox, Master

The Roman Catholics, Centeuary Methodists, Episcopalians, Baptists, Westminster Presbyterians, Second Adventists, and Christians all have congregations in Santa Clara.

The Santa Clara school building is a bandsome structure, fifty-four by seventy-six fect, two stories in height, and was creeted in 1870, of twelve thousand five hundred dollars. The number of children of school nge is about seven hundred.

St. Mary's Academy is a school for girls, and is under the centrol of the Sisters of Notre Dame. The course of education embraces the ordinary English branches.

Quite a number of persons make their homes in Santa Clara whose husiness is almost exclusively in San José.

GILBOY

is located about thirty miles south of San José, on the line of the Southern Pacific Railroad, and contains about two thousand population. It is the centre of a very extensive and rich agricultural country, and contains tho centre of a very extensive and rich agricultural country, and contains the factories of the Consolidated Tobacco Company, whose fields are located in the San Felipe Valley. The surrounding country is devoted largely to dairying, a husiness which has assumed large proportious in this section of the country. Gifroy furnishes good school facilities. In addition to the execulent public schools there are several private seminaries. Most prominent among these is the Convent of the Immaculate Heart of Mary, established in 1871. This is an academy for young ladies. principal building Is seventy-two by thirty fect, two stories high, and is calculated to accommodate thirty boarders and fifty day scholars. All the English branches are taught, hesides the Spanish and French hur-

The city is supplied with water by the Gilroy Water Company, from an immense reservoir three miles from the city, to which point it is con-

ducted from the Uvas Creek, about seven miles from the city.

Gilroy has one newspaper, the Weekly Advocate and Leader, published every Friday, by J. C. Martin.

The Fire Department consists of a force of about one hundred and fifty men, comprising a hand-engine, a hook-and-ladder, and a hose company. The Bank of Gilroy was incorporated June 5, 1871, with a capital of one hundred thousand dollars, which was increased in 1876 to two bun-

dred thousand dollars. The first President was Thomas Rea; the present incumbent is J. C. Zuck.

The societies are Keith Lodge, No. 187, F. and A. M., and Gilroy Lodge, No. 154, I. O. O. F.

The Catholic, Presbyterian, Episcopal, Methodist, Methodist South, and Christian congregations all have church edifices of their own. The city is lighted with gas.

LOS GATOS.

The town of Los Gates was hid out in 1850 by J. A. Forbes, who completed the flour-mill in 1854. This mill, which is the principal feature of the town, is a massive stone structure, fifty by seventy feet, and four stories in height; it is of our grunite, and cost over one hundred thousand dollars. The enterprise failed in Forbes's hands, and passed into the hands of V. Marzion & Co., a French firm, who also fittled. It was then rented by Pfister & Co. and others for a term of years, who found it unprefitable owing to the lack of power for so large a mill through the dry promises owing to the most of power for so large a limit through the dry season. Up to 1866 the power was two twenty-feet iron overshot wheels. In that year W. H. Rogers & Co. purchased the property, and raised the head to sixty feet, substituting turbine wheels for overshot. In 1870 the head was raised to two bundred feet, when the power was found ample for all purposes. At that time the firm was incorporated under the name of the "Los Gatos Manufacturing Company," and a two-set woolen-mill was built; but it was destroyed by fire in June, 1874. The town is located about ten miles from San José, on the Santa Cruz road. It has a population of about five hundred.

is situated about two miles above Los Gatos, and is the regular stoppingplace for the San José and Santa Cruz stages.

SARATOGA

contains about two hundred inhabitants, and is located about three miles north of Los Gatos and ten miles from San José. It is the location of one branch of the Saratoga and Lick's Mills Paper Mills and of Summervillo's Pasteboard Mills.

MOUNTAIN VIEW

is located about eight miles north of San José, and has a population of about three hundred.

At one time it promised to become a very flourishing town, but when the railroad was built it missed the town by about a mile, and the result was that another town sprung up at the railroad station. It is surrounded hy a fine agricultural country, and is within two miles of Bay View Landing. It contains two hotels, a good school, churches, a public hall, and other buildings. To distinguish it from the town at the slation, it is called Gld Mountain View.

MAYFIELD

was laid out by William Paul, in 1807. It is a very handsome place, and is the centre of one of the richest purtions of Santa Clara Valley. It contains two hotels, several dry goods and other stores, grain ware-It has an excellent graded school and fine school buildings, several churches, and a fine ball. A public road was opened in 1874 to Scale's embarcadero, on the bay, which gives excellent facilities for trans-portation of produce by water, in addition to the accommodations offered by the railroad.

The "Ayrshiro Farm," a view of which may be seen in this work, is situated one-half mile southwest from Mayfield. It comprises twelve hundred and forty-two acres of fine arable land, and is almost exclusively devoted to dairying and viniculture. Mr. Peter Coutts, the proprietor, has atready spent an enormous sum of money in stocking and improving it, and his plans that are now being carried out will require much more. His herd of "Ayrshires" and "Holstein" cattle is the finest in the State, many of them coming directly from the best herds in Europe. The most serupulous neatness and order prevails throughout his extensive dairy and wine manufactory. The want of space forbids us giving a more extended description of these premises.

ALVISO

is situated at the head of San Francisco Buy, about soven mites north of San José, and was at one time one of the most important towns in this section of the State,—it being the shipping-point for all this section of

the country. But the construction of the railroad changed the current of travel and freight, and Alviso sunk into insignificance, except as a point of shipment for the limited country which immediately surrounds For several seasons past a small steamer has plied between that point and San Francisco, carrying passengers, but mainly run for the transportation of strawberries and other fruit. A narrow-gauge railroad is now being built between Dunbarton Point, in Alameda County, and Alviso, and is projected into Sau José. If this road is built, Alviso will again acquire some of her former importance.

MILPITAS

is situated about seven miles northeast of San José, on the Western Pacific Railroad. It has about three hundred inhabitants, a good school, two churches, a hotel, and several stores, and an extensive blacksmith and carringo shop

SANTA CLARA COUNTY STATISTICS.

The following tables, from the San José Daily Mercury, July 9, 1876, represent the products of the County, as compiled from the books of the Assessor, for the year 1875:

AGRICULTURAL.

* Atso Great Britain, not stated; Amador, 34; El Dorado, 8; Sacramento, 2; San Francisco, 29; San Joaquin, 2; Santa Clara, 1.

POPULATION OF CALIFORNIA, MINOR CIVIL DIVISIONS, Etc., 1870.

Note. - The marginal column marks townships or supervisor's districts, precinets, and land-survey townships; the first indentation, cities; the second, towns. Names of towns are placed under the names of the townships upervisor's districts, precinets, and land-survey townships in which they are respectively situated. The population of each township or supervisor's district, precinet, and land-survey township, includes that of all towns or supervisor's situated in it.
